

# IBM Garage for Systems & Washington Systems Center Workshop

IBM Garage

## *z/OS Container Extensions (zCX) Workshop*

- Learn how to onboard and leverage this exciting new technology to run Linux® on IBM Z® binaries packaged as Docker containers directly on z/OS®!
- Customized offering that can be tailored to the client's needs including modules such as:
  - zCX Technology discovery and client value
  - Planning for zCX including requirements, pre-reqs and resource planning
  - Learn how to operationally control zCX
  - Learn zCX clustering / orchestration technology
  - Choose from several real-world use cases demos
  - Hands-on labs to provision zCX servers, get familiar with Docker, performance management of zCX, zCX life cycle management
  - Much more
  - Can run from ½ day to 2 days or more
