

“SoftLayer provided expertise we couldn’t get from other providers. It’s been critical for the quality and performance of our service.”

—Yiannis Giokas, Founder and Chief Executive Officer, Crypteia Networks

Business challenge

To deliver its behavioral-based threat intelligence offering to customers worldwide, Crypteia Networks needed a powerful cloud platform with international data center presence.

Transformation

After evaluating Amazon Web Services (AWS), Microsoft Azure and SoftLayer® cloud platforms, Crypteia joined the SoftLayer Catalyst Startup Program. The business provisioned SoftLayer bare metal server infrastructure to support high-performance global delivery of the MOREAL solution.

Crypteia Networks

Business benefits

Drives down costs

with SoftLayer technology that delivers greater impact at a lower price point than competitive offerings

Minimizes IT management

with high-performance servers that reduce administrative overhead

Supports global expansion

with SoftLayer data center facilities available worldwide for solution delivery

Crypteia Networks

Delivering behavioral-based threat protection worldwide with SoftLayer technology

Founded in 2011 and headquartered in Athens, Greece, Crypteia helps enterprises combat cybercrime and attacks with MOREAL, a threat intelligence offering built around a proprietary self-learning algorithm. The company is a subsidiary of global telecommunications and networking leader PCCW Global.

Solution component

- SoftLayer®
