

Weather matters to life sciences and pharma organizations

We surveyed **1,000 C-level executives representing 15 countries and 13 industries** to find out how weather impacts organizations. Here's what we learned from 50 executives in the life sciences and pharma industry.

Weather often has a negative impact on business

40%

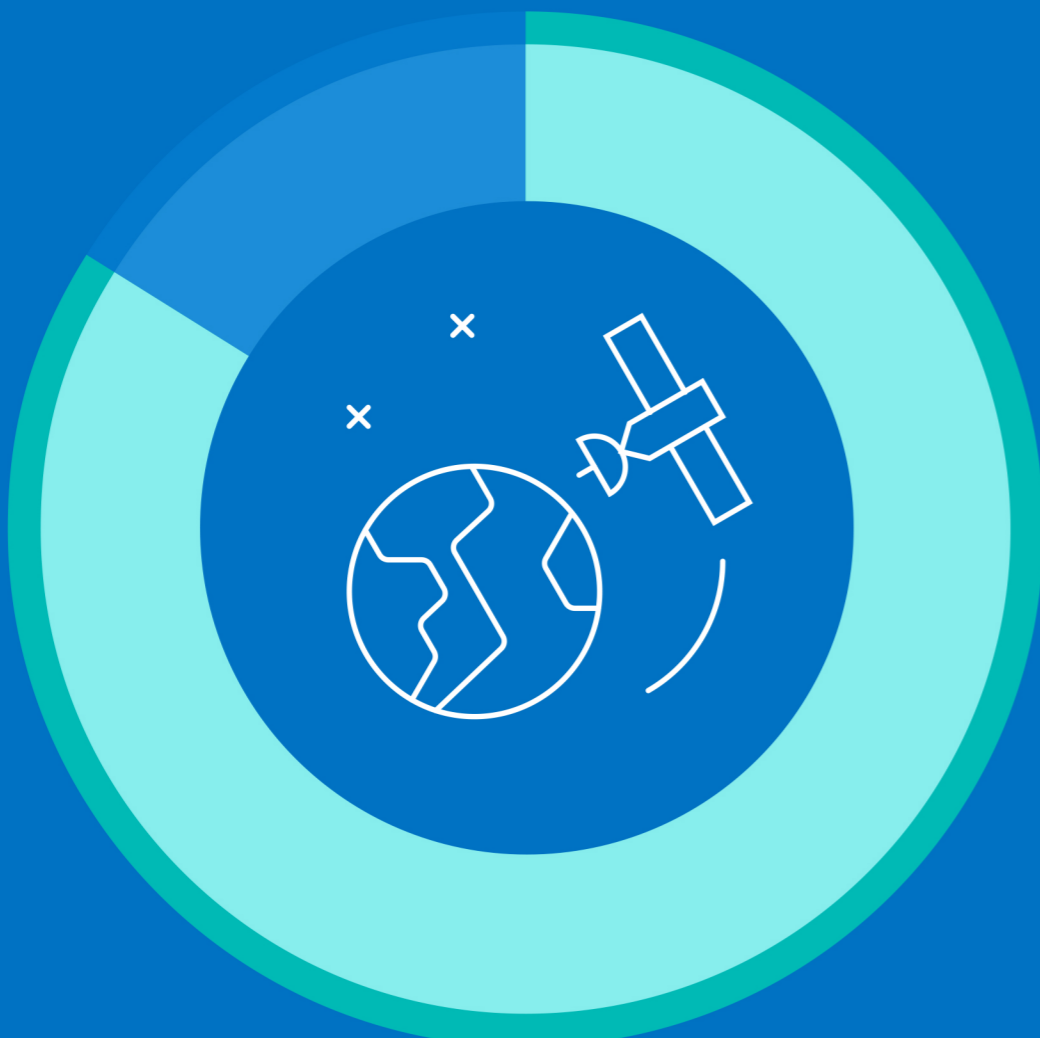

report that weather has **negatively impacted revenue** in the past 12 months

62%

also say weather has **negatively impacted operating costs** in the past 12 months

But weather insights can turn the lows into highs

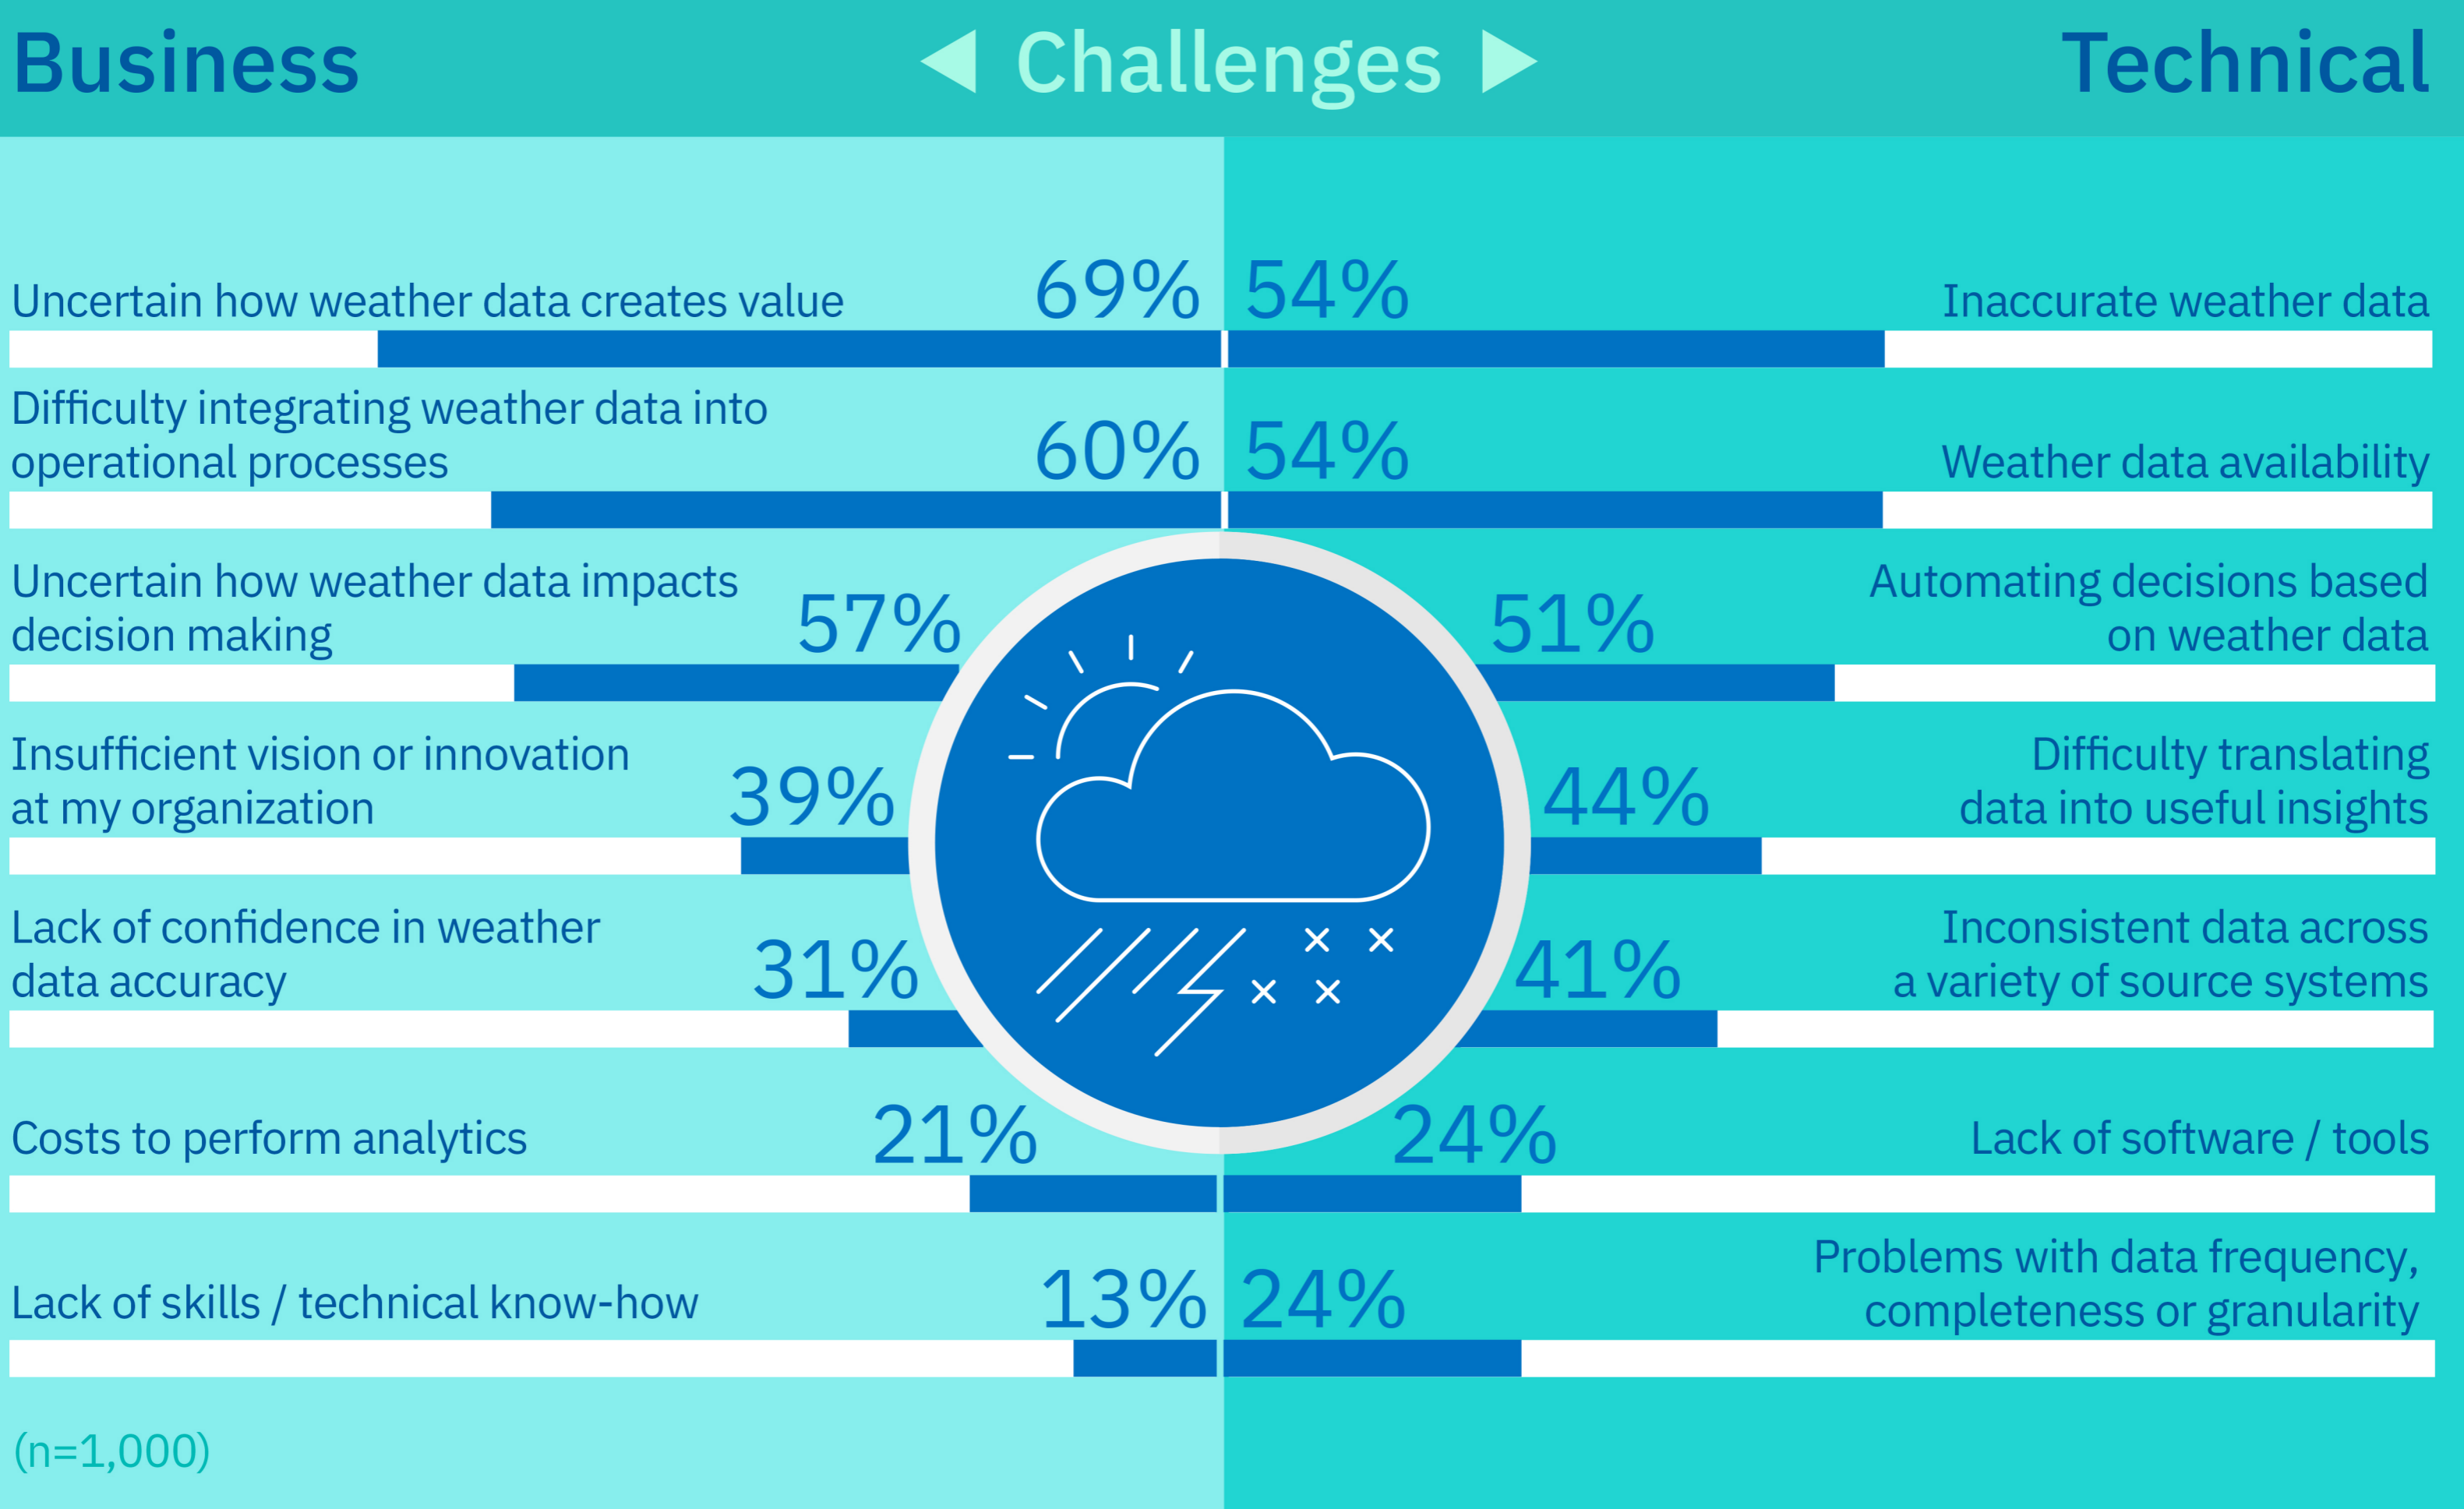

84% expect improved weather insights could lead to **annual revenue growth** of up to 2% or more

94% say weather insights could **reduce annual operating costs** by up to 2% or more

So what's stopping executives from gaining better weather insights?

Find out how your organization can overcome these obstacles.

1

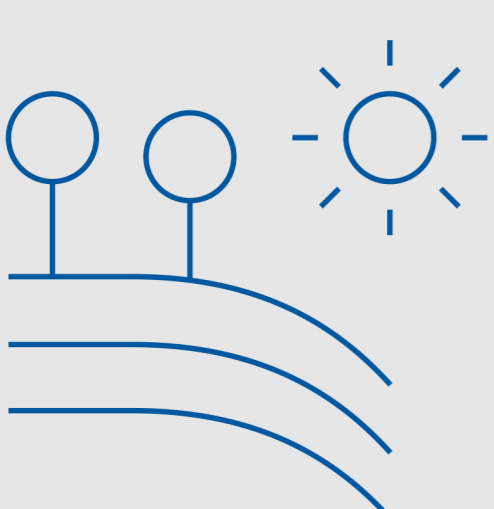

In what ways are weather-related insights influencing decision-making in your organization?

2

How could weather insights improve your operational planning?

3

How can you access the capabilities necessary to leverage weather insights?

Stop wondering if a hard rain's going to fall and learn how to put weather to work.
