## At a glance

**IBM<sup>®</sup> TRIRIGA<sup>®</sup> Application Suite 11.1** is an integrated workplace management system that enables access to a full set of real estate and facilities applications, with flexibility to start with any real estate or facilities discipline and expand into other areas. This release delivers a new Limited Occasional AppPoint consumption license tier, providing the same access and functionality as the Limited tier but limited to 60 hours of access per month and at a lower AppPoint usage per user. This release also includes the updates provided in the stand-alone delivery of IBM TRIRIGA Portfolio Data Manager 11.1, IBM TRIRIGA Application Platform 4.1, and IBM TRIRIGA CAD Integrator/Publisher 13.1.

**IBM TRIRIGA Portfolio Data Manager 11.1** delivers the following Lease Accounting enhancements:

- Disclosure Reports -- Historical Reporting and Foreign Currency Exchange Rate (FX) Handling: When reporting historical financial information, TRIRIGA now reports financial information from prior periods when the reports are run after the original run date. As a result, TRIRIGA identifies and provides the version of a historic lease record to use for Disclosure Reporting. In addition, the FX handling capabilities of TRIRIGA have been significantly enhanced to enable reporting in both functional and reporting currencies.
- Roll Forward Reports: The financial information for the changes and movements in Lease Liabilities and Right-of-Use-Asset values for each reporting period required to reconcile opening and period end balances and provide audit trail and transactional support is now available in newly created Roll Forward Reports. These reports are available in both functional and reporting currencies.
- GASB 87 Lessee Accounting: New functionality supports the key provisions, accounting treatment, and disclosure reporting requirements of GASB Statement 87 for leases for state and local governmental lessee organizations in the United States.

**IBM TRIRIGA Application Platform 4.1** brings:

- A new Microsoft<sup>™</sup> Exchange webhook integration option for clients using the Microsoft Graph API allows for custom integrations to be built between

TRIRIGA and Microsoft Exchange that enable TRIRIGA to receive notifications when changes are made to Microsoft 365 resources, such as meeting rooms, managed through the Graph API. A new form allows for creating and managing subscriptions, and a new workflow event type enables receiving and processing notifications.

- New REST API endpoints for queries and reports that enable easier development of integrations for TRIRIGA.
- Other minor enhancements and fixes.

**TRIRIGA CAD Integrator/Publisher 13.1** delivers:

- Minor enhancements and fixes

## Overview

### IBM TRIRIGA Application Suite 11.1

IBM TRIRIGA Application Suite offers an integrated workplace management system that enables access to a full set of real estate and facilities applications, with flexibility to start with any real estate or facilities discipline and expand into other areas. This flexibility uses a simplified, suite-based licensing structure and does not require additional provisioning as additional applications are adopted. Deployment flexibility, through Red Hat<sup>(R)</sup> OpenShift<sup>(R)</sup> and hybrid cloud, enables diverse options for streamlined provisioning and administration of TRIRIGA Application Suite with multiple cloud providers.

TRIRIGA helps organizations manage and optimize their workplace experience, facility resource scheduling, facility strategic planning, transaction management, lease accounting, capital project management, space management, facility maintenance management, facility sustainability management, and asset disposition. This helps organizations control costs, optimize performance, and improve underperforming properties. TRIRIGA Application Suite, powered by the TRIRIGA Application Platform running on Red Hat OpenShift, streamlines installation and administration, while enhancing the user experience with shared data, workflow, and user experience.

TRIRIGA Application Suite delivers a single integrated workplace management system that offers:

- Increased visibility into underperforming facilities, resources, and process
- Improved control of facility occupancy and operating costs
- Engaging workplace services for building occupants
- Automated activities that are designed to increase efficiency and organizational effectiveness of real estate, facility management, and environmental sustainability functions within midsized and large-sized commercial and public enterprises

TRIRIGA Application Suite includes the following:

- TRIRIGA Space delivers an integrated data repository for space management with tools, reports, and automation to perform moves and audits, track utilization, and make strategic space management decisions. It also facilitates space coordination for workplace reservation management. Computer-aided design (CAD) and building information modeling (BIM) integration enables powerful loading and synchronization of floor plan and asset data from drawings and models with TRIRIGA.
- TRIRIGA Reserve supports resource scheduling and coordination of room and desk reservations for workplace occupants by optimizing availability, guiding selection, and eliminating conflicts.
- TRIRIGA Lease Administration streamlines property management activities and eliminates overpayments or penalties through automated tracking of payment streams and invoice validation against contract terms.

- TRIRIGA Lease Accounting helps meet US and international standards and assists in achieving compliance for lease accounting and reporting requirements by providing integrated lease lifecycle data management, accounting treatment and calculations, journal entries, and disclosure reporting.
- TRIRIGA Transactions provides decision support for organizations to manage lease renewals, new leases, and real estate purchases and disposals. It provides visibility of current performance and scenario modeling to help in making data-driven decisions with confidence.
- TRIRIGA Facility Condition analyzes the existing and projected future condition of facilities and the building systems and assets within those facilities.
- TRIRIGA Services optimizes the performance of service fulfillment by automating service management processes, from the capture of service requests to the routing of service calls.
- TRIRIGA Maintenance establishes preventative and break-fix maintenance processes to improve efficiency and reduce operating costs.
- TRIRIGA Projects improves project cycle time, eliminates budget overruns, removes resource bottlenecks, and analyzes project risks for better planning decisions.
- TRIRIGA Facility Sustainability delivers tools and metrics to identify and evaluate opportunities to reduce energy use and the overall carbon footprint of real estate portfolios.
- TRIRIGA Metrics supports the alignment of workplace assets and operations with business strategy and enables analysis of performance objectives by tracking key performance metrics. It enables actions to increase the value of workplace assets and lower the cost of facility operations.
- TRIRIGA Configure provides tools to build or configure TRIRIGA applications, including creating or modifying queries, navigation, business objects, forms, and workflows.

While TRIRIGA also continues to be offered in its classic perpetual licensing model, the new simplified, suite-based licensing structure provides a single point of access to all the components within TRIRIGA suite.

TRIRIGA applications are built on the TRIRIGA Application Platform, an innovative, multitier web platform that is designed to give users increased flexibility, accessibility, and scalability. This platform uses a highly scalable architecture, a metadata model that enables you to extend and enhance TRIRIGA's products or create modules that integrate with the predefined logic and processes into a feature-rich, workflow-driven system without coding.

### **IBM TRIRIGA Application Suite Managed Service**

TRIRIGA Application Suite Managed Service continues to provide hosting and management of TRIRIGA Application Suite on IBM Cloud<sup>(R)</sup> with the support of IBM operational experts. The solution offers the following features and benefits:

- Access to a managed service for deployment of clients' TRIRIGA Application Suite on IBM Cloud through Red Hat OpenShift. Entitlement and licenses to TRIRIGA Application Suite software must be purchased separately.
- Scalability that enables users to add memory and data storage on demand.
- A managed service that includes installation, configuration, platform upgrades, application operations, database management, infrastructure, and network management, including Red Hat OpenShift application installation.
- Support from experienced IBM service and operational specialists.
- Potential for increased productivity with a focus on business decisions and innovation rather than just system maintenance.
- On-demand benefits that remove barriers to heavy deployment requirements and upfront investment. Organizations can start with only the components they need and pay for only the components they use.
- Cost, operational, and labor-saving benefits of shifting the burden of security and compliance to IBM support specialists.

When combined with TRIRIGA Application Suite software licenses (offered separately), TRIRIGA Application Suite Managed Service delivers an integrated workplace management system (IWMS) that integrates functional models across real estate, capital projects, facilities, workplace operations, portfolio data, and facility sustainability management within a single technology platform to assist engineers, operators, and managers in making the best decisions and taking the best actions.

### **New in TRIRIGA Portfolio Data Manager 11.1**

#### Disclosure Reports -- Historical Reporting and Foreign Currency Exchange Rate (FX) Handling

- New BIRT disclosure reports have been developed to ensure that the reported financial information from previously reported periods do not change when the report for that period is run subsequently. The journal entry process now runs in both the lease currency and the functional currency using a new currency conversion feature. In addition to converting the Journal Entries at established FX rates, calculation logic accounts for FX gain/loss on the Lease Liability and the Accrued Interest Balance due to changes in the month end FX rates.
- Functional Accounts have been added to collect and summarize the journal entries into Lease Summary Balances (LSBs). A snapshot of the LSB for each Functional Account is created when the journal entries are processed, and the period closed. This snapshot record feeds the Disclosure Reports and the newly created Roll Forward Reports. A separate set of LSBs is created and stored for local reporting. When a historic disclosure is required to be run, it sources data from the appropriate LSBs.

#### Roll Forward Reports

- New Right-of-Use Asset Roll Forward and Lease Liability Reports have been delivered. The new reports provide summary and detail schedules of the period opening and closing balances with all the movements that occurred during the period. The reports consist of breakouts of the Gross Asset Value and the Accumulated Amortization accounts for the Right-of-Use-Asset and for the Liability and the Accrued Interest accounts for the Lease Liability. The reports support confirmation that everything is being recorded and accounted for correctly.
  - The inputs to the reports are pulled from the LSBs and are available in both the functional and the reporting currency.
  - Period ending balances for each component are reconciled and checked against the balances displayed on the accounting schedules in both the accounting and the local reporting tabs.
  - Reconciliation in the functional currency will include FX gains and losses associated with the lease liability. TRIRIGA calculates these values in accordance with the US and international accounting standards.
  - The reconciliation in the reporting currency includes Cumulative Translation Adjustments associated with Balance Sheet and Lease Expense accounts resulting from movements in month end rates and average rates.
- An additional Non-Cash Supplemental report replaces the Lease Initial Recording Report, using data from the Lease Summary Reports.

#### GASB 87 Lessee Accounting

- New functionality supports the key provisions, accounting treatment, and disclosure reporting requirements of GASB Statement 87 for leases for state or local government organizations in the US. The new functionality covers Terminology, Lease Classification, Determining and Reassessing Lease Term, Transitioning existing Capital and Operating Leases, Initial Recognition and Subsequent Accounting, Remeasurements and Reassessments, Impairments, Index Adjustments, Terminations and Expirations, and Disclosure Reporting.
- In a governmental lessee, the lease accountant can apply the required accounting treatment in TRIRIGA:

- At the commencement of the lease term, the lessee recognizes a lease liability and an intangible right-to-use lease asset (lease asset). The lease liability will be measured at the present value of payments expected to be made during the lease term.
- Lease payments will result in reduction of the lease liability and recognition of interest expense.
- The lease asset will be measured as the sum of the initial measurement of the lease liability, initial direct costs, and lease payments made prior to commencement, less any lease incentives.
- The lease asset will be amortized over the shorter of the lease terms or the useful life of the underlying asset.
- As regards transition to GASB 87, the statement requires that leases are recognized and measured using the facts and circumstances that existed at the beginning of the period of implementation. If applied to earlier periods, leases are recognized and measured using the facts and circumstances that existed at the beginning of the earliest period restated.
- The cumulative effect, if any, of applying this statement are reported as a restatement of beginning net position (or fund balance or fund net position, as applicable) for the earliest period restated.

#### **New in TRIRIGA Application Platform 4.1**

- A new Microsoft Exchange webhook integration option for clients using the Microsoft Graph API allows for custom integrations to be built between TRIRIGA and Microsoft Exchange that enable TRIRIGA to receive notifications when changes are made to Microsoft 365 resources, such as meeting rooms, managed through the Graph API. A new form allows for creating and managing subscriptions, and a new workflow event type enables receiving and processing notifications.
- New REST API endpoints for queries and reports that enable easier development of integrations for TRIRIGA.
- Other minor enhancements and fixes.

IBM TRIRIGA Application Suite is an integrated workplace management system that consists of a suite of business applications that include prebuilt performance metrics, business controls, and process automation to help simplify and accelerate the management of real estate and facility assets across a business real estate lifecycle. The solution helps organizations manage and optimize their workplace experience, facility strategic planning, transaction management, lease accounting, capital project management, space management, facility maintenance management, facility sustainability management, and asset disposition.

For IBM TRIRIGA Portfolio Data Manager, each product within the IBM TRIRIGA integrated workplace management suite can be acquired independently or combined, depending on an organization's specific needs. The following components are available within the TRIRIGA integrated workplace management suite, and these capabilities also are delivered as a cloud service through the IBM Facilities and Real Estate Management offering:

- IBM TRIRIGA Facilities Manager manages space planning and facility utilization.
- IBM TRIRIGA Real Estate Manager manages lease accounting and occupancy costs.
- IBM TRIRIGA Reservation Manager enables reservation of rooms, hoteling space, and other facility resources.
- IBM TRIRIGA Workplace Operations Manager manages facility maintenance activities and service delivery.
- IBM TRIRIGA Capital Projects Manager manages capital project planning and project schedules.
- IBM TRIRIGA Real Estate Environmental Sustainability Manager delivers tools and metrics to identify and evaluate opportunities to reduce energy use and the overall carbon footprint of real estate portfolios.

These applications consist of a logically related collection of prebuilt data structures, user interfaces, and workflows, all configured with the web-based, design-time components of the TRIRIGA Application Platform and configurable by IBM Global Business Services<sup>(R)</sup>, IBM Business Partners, and organizations without changes to source code.

### **IBM Technology Support Services (TSS)**

Get preventive maintenance, onsite and remote support, and gain actionable insights into critical business applications and IT systems. Speed developer innovation with support for over 240 open-source packages. Leverage powerful IBM analytics and AI-enabled tools to enable client teams to manage IT problems before they become emergencies.

TSS offers extensive IT maintenance and support services that cover more than one niche of a client's environment. TSS covers products from IBM and OEMs, including servers, storage, network, appliances, and software, to help clients ensure high availability across their data center and hybrid cloud environment.

For details on available services, see the [Technology support for hybrid cloud environments](#) website.

## **IBM Expert Labs**

Expert Labs can help clients accelerate their projects and optimize value by leveraging their deep technical skills and knowledge. With more than 20 years of industry experience, these specialists know how to overcome the biggest challenges to deliver business results that can have an immediate impact.

Expert Labs' deep alignment with IBM product development allows for a strategic advantage as they are often the first in line to get access to new products, features, and early visibility into roadmaps. This connection with the development enables them to deliver First of a Kind implementations to address unique needs or expand a client's business with a flexible approach that works best for their organization.

Select your language of choice and scroll down to the Charge Metrics section. Follow-on releases, if any, may have updated terms. Clients will always be directed to the most current published version of the Service Description. To review older versions, use the "Version" drop-down menu to the left of the displayed Service Description to select a previous version.

## Terms and conditions

### Terms and conditions for the licensed product

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is available only through Passport Advantage.

## **Licensing**

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

## **Software Maintenance**

Licenses under the IBM International Program License Agreement (IPLA) provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available. Two charges apply: a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

## **License Information number**

The following License Information documents apply to the offerings in this announcement:

<b>Program identifier</b>	<b>License Information document title</b>	<b>License Information document number</b>
5900-AHQ	IBM TRIRIGA Application Suite 11.1	<a href="#">L-CNUN-CD2KUT</a>
5725-F25	IBM TRIRIGA Portfolio Data Manager 11.1	<a href="#">L-CNUN-CD2KP4</a>
5725-F26	IBM TRIRIGA Application Platform 4.1	<a href="#">L-CNUN-CD2KT8</a>
5725-F45	IBM TRIRIGA CAD Integrator/Publisher 13.1	<a href="#">L-CNUN-CD2KRN</a>

Follow-on releases, if any, may have updated terms. See the [License Information documents](#) website for more information.

## **Limited warranty applies**

Yes

## **Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information about known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, see the [IBM Support Guide](#).

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

## **Program technical support**

### **Standard support**

Technical support of a program product version or release will be available for a minimum of three years from the planned availability date, as long as your Software Subscription and Support is in effect.

This technical support allows you to obtain assistance (by telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, through an announcement letter, of discontinuance of support with 12 months' notice.

If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

For additional information about the IBM Software Support Lifecycle Policies, see the [Standard and enhanced IBM support lifecycle policies](#) website.

### ***Money-back guarantee***

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

### ***Volume orders (IVO)***

No

### ***Passport Advantage applies***

Yes, information is available on the [Passport Advantage and Passport Advantage Express](#) website.

### ***Software Subscription and Support applies***

Yes. Software Subscription and Support, also referred to as Software Maintenance, is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance by telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, see the [IBM Support Guide](#). Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

Unless specified otherwise in a written agreement with you, IBM does not provide support for third-party products that were not provided by IBM. Ensure that when

contacting IBM for covered support, you follow problem determination and other instructions that IBM provides, including in the [IBM Support Guide](#).

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, go to the [Passport Advantage and Passport Advantage Express](#) website.

**Variable charges apply**

No

**Educational allowance available**

Not applicable.

**Terms and conditions for the cloud service**

---

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction for the acquisition of Cloud Services from IBM consist of either the IBM Cloud Services Agreement and the applicable offering Service Description or the IBM International Passport Advantage Agreement or the International Passport Advantage Express Agreement and the IBM Terms of Use - General Terms for Cloud Offerings and the applicable offering Service Description.

**Technical support**

Technical support is provided for Cloud Services and enabling software, as applicable, during the subscription period. Any enhancements, updates, and other materials provided by IBM as part of any such technical support are considered to be part of the Cloud Service, as applicable, and therefore governed by the applicable agreement as defined in Client's quote or transaction document. Technical support is included with the Cloud Service and is not available as a separate offering.

Additional technical support information for this Cloud Service offering may be found in the [IBM Support Guide](#) or in service-specific documentation.

## **Statement of good security practices**

---

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

**Important:** IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

## **Prices**

---

For all local charges, contact your local IBM representative or IBM Business Partner.

### **Business Partner information**

If you are an IBM Business Partner acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBMid and password are required to access the [IBM Passport Advantage](#) or [IBM PartnerWorld<sup>\(R\)</sup>](#) website.

### **Passport Advantage**

For Passport Advantage information and charges, contact your IBM representative or IBM Business Partner. Additional information is also available on the [Passport Advantage and Passport Advantage Express](#) website.

### **IBM Global Financing**

---

IBM Global Financing offers competitive financing to credit-qualified clients to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all client segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or go to the [IBM Global Financing](#) website for more information.

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates are based on a client's credit rating, financing

terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, can help accelerate implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified clients.
