Overview

End of Service

Periodically, IBM^(R) provides notice to customers of plans to terminate services for IBM and original equipment manufacturer (OEM) machines under an IBM Agreement. At this time, we are providing notice that selected machine types, models, and features will be discontinued from maintenance services. IBM will send no further correspondence of this nature for these machine types, models, features, or RPQs.

After the effective date, IBM will no longer offer full hardware maintenance service for the listed machine types. If available, clients will continue to receive limited hardware maintenance service as described in the "Withdrawal" section of your terms with IBM, without lapse in coverage, for select machine types. For a list of affected products and effective dates, see the [Description](#) section.

Replacement options

To assist in transition planning for the announced products to go End of Service (EoS), the [IBM zSystems hardware](#) website provides clients with details on current IBM zSystems hardware offerings.

Model processor capacities for IBM z15TM, IBM z16TM, and future hardware are selected by feature code rather than model for better capacity upgrade transparency within the same machine type model (MTM) family.

- Recommended replacement options for IBM zEnterprise^(R) EC12 (MT 2827, all models) are currently:
 - IBM z16 (MT 3931 Model A01)
 - IBM z15 (MT 8561 Model T01)
- Recommended replacement options for zEnterprise BC12 (MT 2828, all models) are currently:
 - IBM z16 (MT 3931 Model A01)
 - IBM z15 (MT 8562 Model T02)
 - IBM z15 (MT 8561 Model T01)

Description

END OF SERVICE

IBM will withdraw from its maintenance agreements the IBM machine types and models for the products listed below, effective on the End of Service (EoS) dates listed:
