

Expertise and innovation to transform your business on cloud

Our Five Principles

- 1. Methodology and assets**
We provide the most potent hybrid cloud methodology and assets available.
- 2. Deep skills**
We curate the most agile, deeply-skilled expert teams in the industry.
- 3. Fast success**
We champion prescriptive, guided cloud adoption journeys with adaptable blueprints.
- 4. Confidence**
We enable transformations by empowering our clients.
- 5. World-class support**
We deliver world-class support to make sure you succeed.

Your mission is not just to build a cloud infrastructure — it's to strategically adopt cloud and realize its benefits.

** Synergy Research

What we do

Steps to transformation

Learn

Get motivated

Envision your opportunities, set your direction, and create your plan.

Start

Get organized

Assemble and implement the infrastructure, features, and services for your hybrid cloud

Prove

Get moving

Define the functions and rules for your cloud-enabled business, and transition your workloads to your cloud solution.

Transform

Get fearless

Transform a single application or an entire organization to strengthen business and IT alignment, and set a new standard for your strategic solutions.

Capabilities

Envision

Identify opportunities

Determine the opportunities data and cloud offer your business based on your industry.

Design

Cloud and data design

Define the architectural requirements, architectural decisions, and operational design of your cloud and analytics solution.

Build

Hybrid cloud implementation

Successfully configure, implement and deploy your hybrid cloud.

Transform

Transitioned workloads

Transition your new and/or existing workloads to the cloud solution.

Innovate

Cloud native solution

Design and implement cloud native business solutions.

Support + Manage

Cloud technical support

Get help through multiple channels of engagement; address complex problems head-on with our support.

Direction and scope

Develop or refine data and cloud strategy, including planning, gap analysis, and prioritizing workloads and analytics.

Business case

Define the cost of ownership, return on investment, business value or full business case for your cloud and analytics solution.

Operational Management framework

Implement the management framework for the operational environment.

Adapted governance and organization model

Adapt your governance and organizational models for hybrid cloud.

Unlock data

Design and implement an enterprise data platform to enable insights and cognitive intelligence

Managed apps

Built an app with us? We'll help you manage it.

Services offerings

Innovative solution consulting from IBM Cloud specialists

Solution Workshop

Let us work with your team to lay out a foundation for a solution using proven methodologies and best practices.

MVP Build Up

Build and deploy your minimum viable product (MVP) app with IBM Cloud expert assistance.

Health Check

Get a detailed assessment of your deployment, environment, and resources to find ways to improve and optimize.

Accelerated Value Program

Have single-point-of-contact support integrated into your team on a continuous, ongoing basis, reducing total PMRs and accelerating time to resolution.

Design Thinking Workshop

Immerse your team in a creatively disruptive experience that exposes your true objectives and guides you toward innovative success.

Migration and Upgrade

Whether changing products, versions, or platforms, our migration specialists are dedicated to making your transition easy.

Fixed-fee Services

Many of our most popular getting-started offerings are available under simple fixed terms—getting you started even faster.

Bootcamp

Dive into in IBM Cloud technology and go beyond the basics and core principles. Take your innovation to the next level.
