

# Toolfit – Saves 25 percent on cloud hosting costs with a migration to a high-performance SoftLayer hybrid infrastructure

## 25% reduction

in cloud hosting costs with the migration to a SoftLayer® platform

## Improves support

with highly responsive 24x7 service

## Enhances availability

of the company's fitness management platform with dependable performance

**Business challenge:** Toolfit needed a more agile, reliable cloud hosting infrastructure for the management platform it provides to fitness facilities throughout Brazil. In addition to improving application uptime, the organization wanted to team with a trusted IT provider offering exceptional support services.

**Solution:** Based on the SoftLayer cloud platform's flexibility and performance and the included support services, Toolfit migrated its fitness application from a Microsoft Azure environment to a SoftLayer hybrid infrastructure. Hosted in a SoftLayer data center in Dallas, Texas, the company's bare metal and virtual servers support application delivery to customers in Fortaleza, Recife, Bahia and Rio de Janeiro, Brazil.
