IBM Food Trust™ Governance Model

TRUSTED COMMUNITY
Your organization will be part of a trusted community of food supply experts and professionals.

OWNERSHIP & PRIVACY
And the data you upload to IBM Food Trust is owned by you, meaning you decide who sees it.

RULES OF ENGAGEMENT
IBM Food Trust maintains a set of rules to ensure you are protected and the solution is providing security and integrity to all.

INTEROPERABILITY
But what about other systems? IBM Food Trust has the ability to connect to your infrastructure and other blockchain networks as they become available in the future.

USER-LED SOLUTION
You will have representation across the food system via an Advisory Council ensuring the solution evolves and continues to maximize value for your organization.
