

“We needed to know that we’re working with the right people as we grow the business, and with SoftLayer, we’re sure that we are.”

—Val Yuzik, Director of IT, Saskatchewan Blue Cross

Business challenge

To provide online services, Saskatchewan Blue Cross needed a highly reliable web hosting environment. The organization tried partnering with several different hosting providers but experienced outages and downtime.

Transformation

Seeking hosting services from a global cloud provider with data center presence in Canada, Saskatchewan Blue Cross evaluated Amazon, Microsoft and SoftLayer® cloud solutions. Impressed by the SoftLayer platform’s international reach, the company migrated its site to a cloud hosting infrastructure provisioned in the SoftLayer Toronto data center.

Results

With the SoftLayer solution, Saskatchewan Blue Cross established a scalable, powerful hosting platform to support exceptional website performance and launch new services.

Business benefits

Eliminates downtime

with a SoftLayer hosting solution for the organization’s website

Enhances customer service

by improving website availability

Drives growth

with a hosting infrastructure the company can count on to support new services

Saskatchewan Blue Cross

Boosting online performance and enhancing service with SoftLayer cloud technology

Founded in 1946 and located in Saskatchewan, Canada, Saskatchewan Blue Cross offers personal healthcare plans, travel insurance and group benefits plans that include disability management. The nonprofit organization is a member of the Canadian Association of Blue Cross Plans and has approximately 200 employees.
