At a glance

IBM Cloud Pak[®] for Security is an open security platform that connects to customers' existing data sources to generate deeper insights and enables them to act faster with automation. With the introduction of IBM Cloud Pak for Security as a Service, customers can expand their deployment options, including a hosted and managed model.

With this service, customers can:

- Automate manual processes: Reduce investigation and response time by automating tasks and data enrichment.
- Increase visibility: Search hybrid multicloud environments and pull insights into one unified console.
- Enable flexible growth: Choose and add capabilities as needs grow by using modular security solutions.
- Minimize data migration: Quickly connect to disparate security tools and data sources.
- Reduce vendor lock-in: Integrate with many third-party products and add your own custom connections.

Overview

Cloud Pak for Security as a Service is an integrated security platform that offers a unified dashboard across threat management tools. It delivers predictable, usage-based pricing while giving customers the flexibility to choose their preferred deployment model. With Cloud Pak for Security as a Service, IBM[®] handles provisioning, 24x7 management, and version upgrades so organizations can focus on their security and security operations centre (SOC) needs.

With Cloud Pak for Security as a Service:

- Security leaders can:
 - Connect to data wherever it is
 - Manage security from a unified console
 - Leverage automation for faster decision-making
- Security analysts can:
 - Prioritize threats with a customized score
 - Automatically create cases
 - Perform federated search across data sources

- Incident responders can:
 - Automate tasks and logging
 - Create playbooks for incident response
 - Collaborate through a unified console

Cloud Pak for Security as a Service capabilities include:

- Visibility: Unified view across the enterprise, security tools, and threat intel.
- Dashboard enhancements: Ability to share custom dashboards.
- Detection: Rapidly and more accurately identify threats and reduce false positives.
- Investigation: Automate investigations with AI, run federated searches with Data Explorer, and collaborate with integrated Case Management.
- Response: Respond faster with automation playbooks and Ansible[®] integration. Visually manage the complex assortment of cases being worked by the SOC. Remove the traditional complexities of creating and editing playbooks.

Key requirements

- An internet connection and a browser

Planned availability date

June 23, 2021

Accessibility by people with disabilities

Accessibility Compliance Reports (previously known as a VPAT) containing details on accessibility compliance to standards, including the Worldwide Consortium Web Content Accessibility Guidelines, European Standard EN 301 349, and US Section 508, can be found on the [IBM Accessibility Conformance Reports](#) website.

More information is also available on the [Passport Advantage[®]](#) and [Passport Advantage Express](#) website.

Publications

Publications are available in [IBM Documentation](#).

All publications are not currently available in IBM Documentation as HTML. For this reason, the Welcome page links to a complete PDF library. Additional publications are planned to be available as HTML in the future.

Services

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of the lab-based software services team and the business consulting, project management, and infrastructure expertise of the IBM Global Services team. IBM provides the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services, contact your Lab Services Sales or Delivery Leader.

Technical information

Specified operating environment

Software requirements

Information about software requirements is available in [IBM Documentation](#).

Such information is provided subject to the following terms. IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, misappropriated, or misused, or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service, or security measure can be completely effective in preventing improper use or access. IBM systems, products, and services are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

IBM Support

[IBM Support](#) is your gateway to technical support tools and resources that are designed to help you save time and simplify support. IBM Support can help you find answers to questions, download fixes, troubleshoot, submit and track problem cases, and build skills. Learn and stay informed about the transformation of IBM Support, including new tools, new processes, and new capabilities, by going to the [IBM Support Insider](#).

Planning information

Packaging

This offering is delivered through the internet. There is no physical media.

Ordering information

For ordering information, consult your IBM representative or go to the [Passport Advantage](#) website.

This program is only available through Passport Advantage.

Charge metric

Definitions of the charge metrics for this cloud service can be found in the following Service Description document:

| Program identifier | Service Description document title | Service Description document number |
|--------------------|---|-------------------------------------|
| 5900-AGL | IBM Cloud Pak for Security as a Service | i126-9228 |

Select your language of choice and scroll down to the Charge Metric section.

Follow-on levels of this cloud service, if any, may have updated charge metrics. See the [Cloud Services terms](#) website. Search using the four-digit base Service Description number and scroll down to the Charge Metric section.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction for the acquisition of Cloud Services from IBM consist of either the IBM Cloud^(R) Services Agreement and the applicable offering Service Description or the IBM International Passport Advantage Agreement or the International Passport Advantage Express Agreement and the IBM Terms of Use - General Terms for Cloud Offerings and the applicable offering Service Description.

Technical support

Technical support is provided for Cloud Services and enabling software, as applicable, during the subscription period. Any enhancements, updates, and other materials provided by IBM as part of any such technical support are considered to be part of the Cloud Service, as applicable, and therefore governed by the applicable

agreement as defined in Client's quote or transaction document. Technical support is included with the Cloud Service and is not available as a separate offering.

Additional technical support information for this Cloud Service offering may be found in the [IBM Support Guide](#) or in service-specific documentation.

Money-back guarantee

No

Volume orders (IVO)

No

Passport Advantage applies

Yes, information is available on the [Passport Advantage and Passport Advantage Express](#) website.

Other support

Appliance support under Passport Advantage

Educational allowance available

No

Statement of good security practices

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

Prices

Prices are subject to change without notice.

GST, QST, and sales taxes, where applicable, are extra.

For additional information and current prices, contact your local IBM representative.

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative. Additional information is also available on the [Passport Advantage and Passport Advantage Express](#) website.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified clients to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all client segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or go to the [IBM Global Financing](#) website for more information.

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates are based on a client's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Order now

To order, contact the IBM Digital Sales Center, your local IBM representative, or your IBM Business Partner. To identify your local IBM representative or IBM Business Partner, call 800-IBM-4YOU (426-4968). For more information, contact the IBM Digital Sales Center.
