

# IBM Crypto Analytics Tool (CAT)

Crypto Analytics Tool (CAT) collects security relevant information and helps build your [Cryptographic Inventory](#). Through the graphical client, it is easy to analyze security information.

## Benefits

- ✓ Enterprise-wide overview of all z/OS® Cryptographic consuming LPARs from a single CAT Monitor client
- ✓ Offers a comprehensive data view of the cryptographic security on the system
- ✓ Allows monitoring to ensure that keys and cryptographic functions are set up and protected, [complying with best practices](#)
- ✓ Eases [policy and compliance](#) enforcement
- ✓ Helps administrators [understand weaknesses](#) and gaps to prioritize improvements

## Use cases

Comprehensive overview of the cryptographic security of HSM, ICSF and RACF® of the system

Key data for better policy and compliance enforcement  
Define and compare with policies

Identify insecure keys and algorithms

Comparison of current crypto state with previous snapshot for error and problem determination or change control validation
