IBM Federal Contract Vehicles

GWAC COE Managed Portfolio

The IBM GWAC Center of Excellence (COE) manages a portfolio of agency to government-wide acquisition vehicles, ranging from OMB designated tiers 1, 2, to 3 Best In Class (BICs) covering all contract types and providing extensive program management experience and expertise in administering contract vehicles compliant with FAR 16.5 and FAR 8.4.
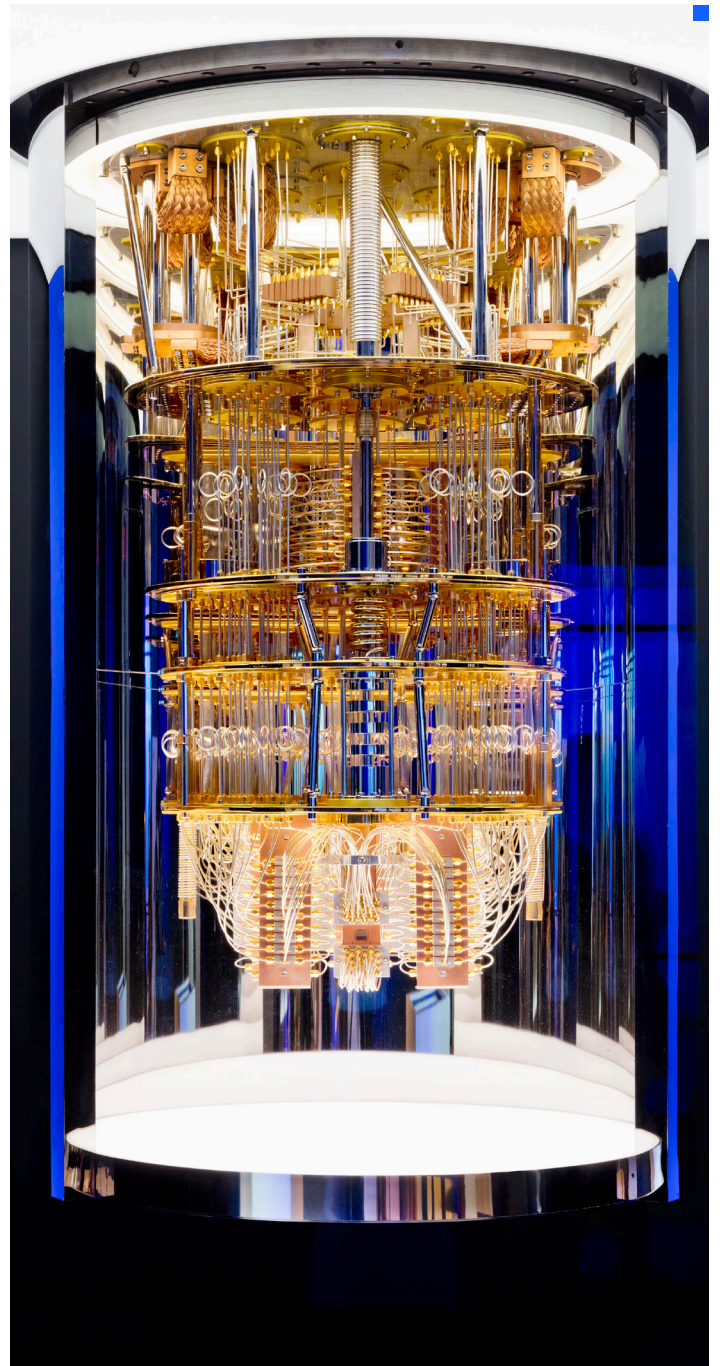

Contract vehicles accelerate time to value and minimize acquisition costs for agencies to keep the process lean and meaningful. They also enable scalability so that agencies can increase the number of responses to their solicitation to maintain healthy competition and engagement with prospective vendors.
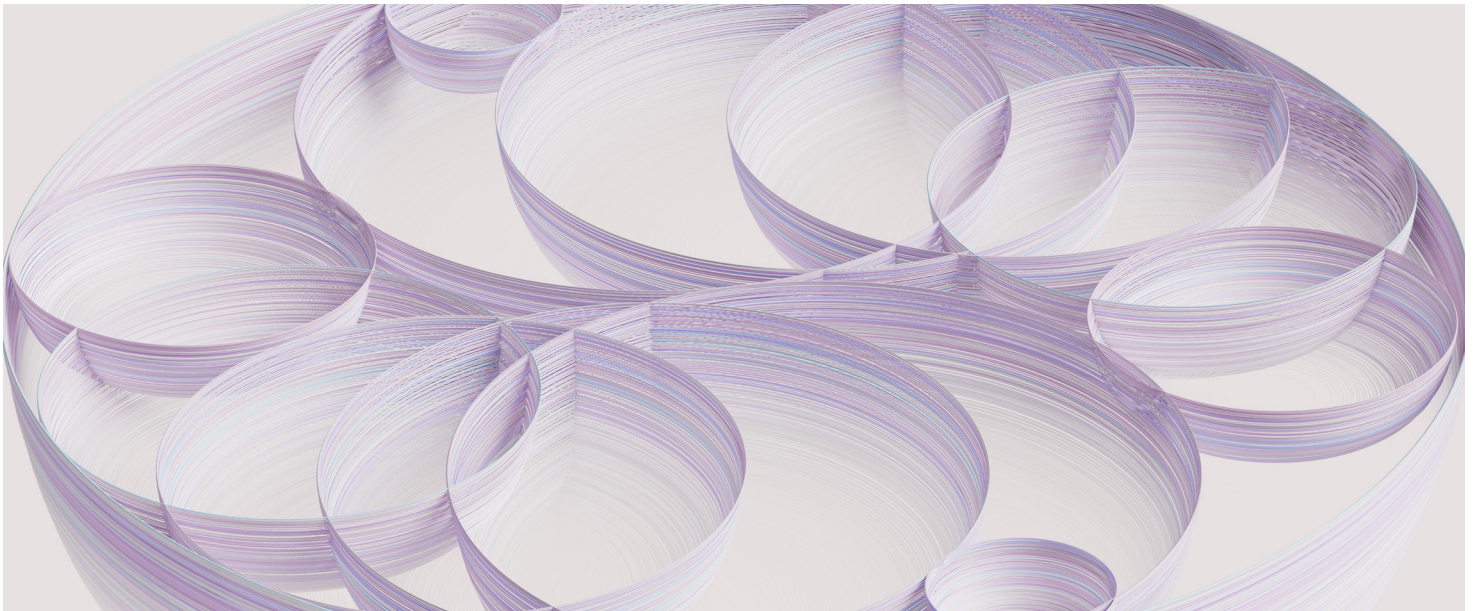

Technologies and Professional Services

Among IBM's core capabilities are the design, development and deployment of technologies, which can be easily procured through one of IBM's federal acquisition contract vehicles to drive purposeful transformation in the Federal space:

– Business Transformation Services
– Hybrid Cloud Services
– Cybersecurity Services
– AI & Machine Learning
– Quantum

For more information regarding the IBM acquisition vehicles portfolio, please visit https://www.ibm.com/contracts/federal or contact us at gwacoe@us.ibm.com.
