“Skills Up” challenge
Winner’s choice of Prizes
Quarterly Prize

To register and create an IBM ID

Start at this link.

<https://ibm.com/account/reg/signup?formid=urx-31628>

Include all your personal information. IBM takes data privacy very seriously and is in compliance to GDPR standards. Your country selection is very important to personalize language and to adapt content that is specific to your country.

If your company is already a member of PartnerWorld there are two options to associate to a company

1 - Searching for your company's name.

Enter your PartnerWorld Profile. <https://www.ibm.com/partnerworld/partnertools>

In the main page, see that there is a box with Quick task links. In this list, search for "Add yourself to a location via search". Complete the required information (noted by a red asterisk) within each page and click on submit at the final confirmation page. The next button in the contact information page, will stay greyed out until you accept the privacy statement. After completing each field allow for the page to refresh.

2 - With your company's unique Token ID

Enter your PartnerWorld Profile. <https://www.ibm.com/partnerworld/partnertools>

In this step, you will need the Token ID from your company (usually an 16 digit code). This ID can be obtained from the APA (authorized profile administrator) or PRC (primary relationship contact) in your company. If you don't know who this person is, please contact PartnerWorld Support. In the main page, see that there is a box with Quick task links. In this list, search for "Add yourself to a location profile". Enter the Token ID on the "Self Association" page and click Submit. This will display your business information. Click the name of your business, then fill in the required information. Please allow up to 2 business days to receive formal admission to the PartnerWorld program via email.

If you have any questions, please call or email [PartnerWorld Contact Services](#). Contact information can be found, by country, on the PartnerWorld Web site.

Skills Up Challenge
