 - Preserve cash and credit lines to meet other strategic needs
 - Financing solutions to speed project approval and implementation
 - Optimize cash flow and align payments to anticipated benefits
-

IBM Project Financing

Single-source financing for IBM-led services solutions

As companies seek to innovate and transform their business by adopting the latest technologies, financial decision makers are looking for more flexible financing options to drive competitive advantage.

Because traditional banks may lack technology financing expertise, they can't always find funding for IT projects that may require multiple deliverables over multiple time periods—including consulting services, investment in infrastructure and data center equipment, and business process implementation. Each of these services and solutions may have high upfront costs that can delay starting a project.

But IBM® Project Financing™ can provide customized financing for your *complete* solution, including all of the services, software, and hardware you need—from both IBM and non-IBM suppliers—so you can start your project now.

The resources you need to finance your complete solution

- **Obtain single-source** financing for IBM-led services solutions including Cloud, Analytics, Commerce, Security, and Watson
- **Conserve cash** and existing lines of credit to meet other strategic business needs
- **Turn upfront cash outlays** into affordable and predictable payments
- **Align cash outlays** with anticipated benefits and optimize cash flow
- **Choose from a wide range of funding options** to create an all-inclusive financial package tailored to specific project, budget or revenue-generation milestones

Technology and funding from one provider

IBM stands apart as a resource that can help you design, build, and run your solution, but also finance your entire project—from simple projects to transformational initiatives.

Take advantage of highly competitive rates, flexible terms, and multiple-period funding for consulting services, transition and transformation costs, software, and hardware from both IBM and non-IBM IT suppliers.

Whether financing services alone or as part of a larger solution, turn to IBM Global Financing for technology and financing from one resource.

*Accelerate your project
break-even point.
Financing can help
align cash outlays with
anticipated benefits.*

IBM Global Financing offerings are provided through IBM Credit LLC in the United States and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates and availability are based on a client’s credit rating, financing terms, offering type, equipment and product type and options, and may vary by country. Non-hardware items must be one-time, non-recurring charges and are financed by means of loans. Other restrictions may apply. Rates and offerings are subject to change, extension or withdrawal without notice and may not be available in all countries. IBM and IBM Global Financing do not, nor intend to, offer or provide accounting, tax or legal advice to clients. Clients should consult with their own financial, tax and legal advisors. Any tax or accounting treatment decisions made by or on behalf of the client are the sole responsibility of the client.

IBM Project Financing availability is subject to country financial regulations. Please consult your IBM Global Financing contact for more information.
