

Future-ready retailing is the new way forward. Are you ready?

Accelerate buying. Simplify retailing.

Struggling to satisfy and retain customers in today's fast-changing retail landscape?

Switch to a retail solution that:

Provides robust retailing functionality

Supports ongoing retail roadmap

Is underpinned by integrated finance capabilities

Easily integrates with current systems

IBM Retail Solution for Dynamics 365 for Finance and Operations

Designed to enhance Dynamics 365 for Finance and Operations and reduce implementation risks

Reduce the **time and effort** spent on managing product and pricing data while improving cross-functional critical path efficiencies

Improve **stock management** processes by building trust in stock positions to help business improve return on stock investment

Develop a robust **stock position** and **streamlined order flow** which allow a positive impact on customer satisfaction, and help reduce contact centre order-to-call ratios

Optimize **pricing mixes** and create **price points** based on SKU data with the 'price modelling wizard' functionality

Stop the proportional dependency between growth and resources through reduced **manual intervention**, **aligned business metrics** and **improved reporting**

Advance **forecasting**, **budgeting** and **inventory management** which in turn can enable better reporting of product data and margin tracking

Leverage IBM's deep industry experience in process automation to **make low-risk, cost-and-time-effective** implementation possible
