

“Leveraging IBM Cloud allows us to really focus on what we're good at and what we need to in order to deliver a successful service.”

—Amit Modi, Chief Product and Technology Officer, Movius

Business challenge

To deliver its global mobility service to enterprises worldwide, Movius sought a trusted cloud provider with far-reaching data center presence and robust backup and restore capabilities.

Transformation

After evaluating Rackspace and Amazon Web Services (AWS) technology, Movius chose an IBM® Cloud™ solution based on IBM’s global reach, reputation and platform maturity. With IBM Cloud bare metal server infrastructure and the Veeam on IBM Cloud backup and restore service, Movius delivers its offering to enterprises around the globe.

Movius

Results

Boosts agility

with IBM Cloud capabilities supporting fast, highly consistent deployment across locations

Strengthens focus

on business-critical needs with cloud infrastructure expertise provided by IBM

Drives growth

and supports further business expansion with continued technology innovation from IBM

Movius

Providing security-rich multiline mobility to enterprises worldwide

Movius provides cloud-based mobility solutions designed to solve compliance and security challenges for global enterprises while improving productivity and cost management. The company serves more than 75 million subscribers and delivers the platform of choice for some of the world's largest mobile carriers, including a multiline solution that separates personal and business communications on a single device. Founded in 2007, Movius maintains headquarters in Atlanta, Georgia, and five additional office locations worldwide.

Solution component

- IBM® Cloud™
- Veeam on IBM Cloud
