VOICE OF THE CUSTOMER

#1

- Experience in launching production-ready business networks and active consortia. IBM believes that blockchain is a team sport. IBM has emerged as an open and inclusive partner, working along with several other blockchain firms and ecosystem start-ups. Given the consortium experience, IBM is well positioned to take on the challenge of industry consensus, which remains one of the biggest hurdles in blockchain adoption.
- Largest contributor to the Hyperledger Fabric, the leading permissioned network for enterprise blockchain. The synergy between IBM and Hyperledger has made IBM Blockchain Platform an open, interoperable, multi-cloud and industrial strength blockchain platform.
- Global general contractor. IBM is already seeing many of its delivery efforts cross industry opportunities to work across networks, geographies, and complementary industries as the global general contractor of blockchain capability
- Intellectual property. IBM inventors received a record 9,262 patents in 2019, marking the company's 27th consecutive year of US patent leadership. Overall, nearly half of the 2019 patents relate to pioneering advancements in AI, cloud computing, security, blockchain and quantum computing.
- Full spectrum of blockchain capability across strategy and design, business and industry processes, technology, integration services, business process services, IoT, automation, AI, advanced analytics, and research.
- Consortium launch methodology, which provides a framework for governance and key commercial decisions, symbolizes IBM's expertise in scaling blockchain to production-grade implementations.
