

SOLUTION SHEET

HORTONWORKS CONNECTED DATA SUITE

Businesses today need speed and agility to understand all facets of their customers, run their business, competitively grow and protect their assets. Hortonworks connected data suite offers a complete solution capturing perishable insights from data in motion and rich, historical insights from data at rest, necessary for modern data applications which require both streaming and historical data.

HORTONWORKS DATAFLOW (HDF™)

HDF, powered by Apache™ NiFi, Kafka and Storm, collects, curates, analyzes and delivers real-time data from the IoT to data stores both on-premises and in the cloud.

HORTONWORKS DATA PLATFORM (HDP®)

HDP is the industry's only true secure, enterprise-ready open source Apache™ Hadoop® distribution based on a centralized architecture (YARN). HDP addresses the complete needs of data-at-rest, powers real-time customer applications and delivers robust analytics that accelerate decision making and innovation.

Connected data suite integrates and accelerates big data deployments, and enables modern data applications such as:

- **Real-Time Cyber Security**—protects systems with superior threat detection
- **Smart Manufacturing**—dramatically improves yields by managing more variables in greater detail
- **Connected, Autonomous Cars**—drive themselves and improve road safety
- **Real-time Fraud Detection**—Machine Learning at scale for instantaneous fraud detection and notification
- **Future Farming**—optimizing soil, seeds and equipment to measured conditions on each square foot
- **Automatic Recommendation Engines**—match products to preferences in milliseconds

Hortonworks connected data suite is the only integrated big data solution for both data in motion and data at rest. By complementing the power of perishable insights against historical data, enterprises are able to create a comprehensive view of all the data necessary for real-time customer insight, business operations, asset security predictive maintenance, competitive advantage, 360 degree view of a customer and more.

About Hortonworks

Hortonworks is a leading innovator at creating, distributing and supporting enterprise-ready open data platforms. Our mission is to manage the world's data. We have a single-minded focus on driving innovation in open source communities such as Apache Hadoop, NiFi, and Spark. Our open Connected Data Platforms power Modern Data Applications that deliver actionable intelligence from all data: data-in-motion and data-at-rest. Along with our 1600+ partners, we provide the expertise, training and services that allows our customers to unlock the transformational value of data across any line of business. We are Powering the Future of Data™.
