

Impacts of returning equipment not leased with IBM Global Financing

Please be advised that, except as expressly specified in your lease, you are only permitted to return the same item of leased equipment (i.e., same manufacturer, type, model number, and serial number asset).

If unauthorized equipment is returned, then:

- You will have relinquished any and all right, title and interest you may have in the unauthorized equipment with title transferred to IBM Global Financing. In that situation, title will pass to IGF free and clear of any liens, restrictions, or other obligations. At our option, we may:

(a) sell the unauthorized equipment and retain the proceeds of the sale, or

(b) dispose of the unauthorized equipment. If the latter should occur, we will provide an invoice for our disposal fees and related expenses. These fees will be the same as what we would charge for the disposal of similar equipment. In no event will IBM Global Financing have any liability or be subject to any claims or remedies which may arise in connection with our disposal of the unauthorized equipment.

- If PC (as defined below) unauthorized equipment is received and it is of the same manufacturer, type, and model number as equipment you are leasing from IGF for which the term:

(i) is scheduled to expire within one month following the date we receive the unauthorized equipment;

(ii) has expired within one month preceding the date we receive the unauthorized equipment; or

(iii) was automatically extended, in each case, in accordance with the terms of the lease,

then IGF may, at our discretion, accept the unauthorized equipment as a substitute for a leased machine. If that occurs, the unauthorized equipment will become subject to all of the terms and conditions of the lease for the leased machine it replaces. In that event, IBM Global Financing will have released all of our right, title and interest in the leased machine. For purposes of this statement, "PC Equipment" means personal computers, notebooks, tablets, monitors, Intel based servers, personal computer printers and other related personal computer equipment.

- For non-PC unauthorized equipment returned where a written request, within 30 days of receipt, was received by ASKEOL@us.ibm.com (or other contact address that IGF may provide in the future) to return the equipment to you, IGF may do that at your expense.

- IBM Global Financing may, but have no obligation to, remove any information, license programs, or any other data contained on the unauthorized equipment and shall not have any liability for the loss, destruction or disclosure of any such information, licensed programs, or any other data on any unauthorized equipment.

Please always refer to your End of Lease Quote Terms & Conditions for further clarification on this topic.
