

IBM Maximo

The world's leading enterprise asset management solution

Get essential insights for intelligent asset maintenance and operations. With enterprise asset management, you can operate and maintain high-value assets, optimize performance, extend asset lifecycles and reduce operational downtime and costs.

Grid® Report for Enterprise Asset Management (EAM) Summer 2019

* The Grid® Report for Enterprise Asset Management (EAM) | Summer 2019 is based off of scores calculated using the G2 Grid® algorithms from reviews collected by May 29, 2019.

Maximo is a very robust EAM system that will allow you to configure asset lifecycle maintenance activities at an enterprise level. It is more user friendly than many of the other enterprise level systems and is easily configurable to allow very specific solutions to be designed based on your business case.

Meets Requirements

Ease of Doing Business

Keeping our inventory under control had been an issue. With many moving parts between systems and reporting tools the process to cycle count and generally manage inventory was a pain to say the least. **Using mobility and diving deeper in our understanding of Maximo's material management capabilities has helped us to gain better control of all aspects of our inventory.**

- G2 Reviewer, 5.0 Stars

Ease of Setup

Ease of Use

We're using inspections and Maximo anywhere to track maintenance. **Because we have better visibility to issues we get the attention needed to fix them immediately and encouragement and support to find long term solutions.**
