

What if you started work on your house **but without a full set of tools?**

You'd experience delays and unexpected costs each time you found you didn't have the tool you needed and had to buy it.

Plan ahead

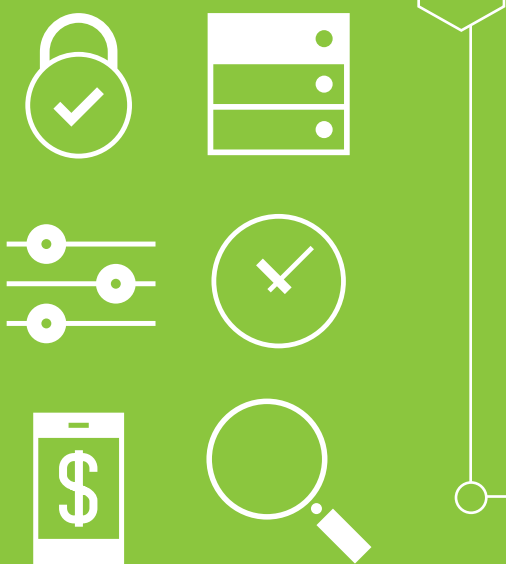

But if you bring the right tools to the job, you avoid delays, and probably spend a lot less on tools.

Renovating IT infrastructure

More storage software will be needed as businesses add flash, file, object and software defined to their IT infrastructure.

IBM Spectrum Storage Suite is a comprehensive family of software-defined storage products.

Access to the entire **IBM Spectrum Storage** family so you have the software you need when you need it. Simple, predictable per-TB pricing, No unexpected costs or licensing hassle when you switch among software.

Software capabilities

- Data protection and recovery
- Storage and data management
- Software-defined block storage
- Block storage virtualization
- File and object storage
- Data archive
