

Services and Solutions

The primary service being procured by the Government under Suite 1 is Operating Environments provisioned in Fixed Datacenters and ordered within Task Orders. Additional services, in scope of the Contract, will be ordered on a Task Order basis.

Ownership and operation of operating environments, real estate, capital equipment and facilities may be owned by:

- Contractor owned and operated (COCO)
- Government Owned and Contractor Operated (GOCO)
- Hybrid

Provision of Fixed Datacenters (Suite 1 only):

- Provide, maintain, operate, and support fixed datacenters, supplying virtualized resource capacity to Army application owners
- Perform fixed data center management tasks that may including datacenter maintenance, power, HVAC, and/or any aspects of physical plant necessary for operation of a fixed data center
- Perform appropriate physical and environmental security measures to ensure compliance with Federal, DoD, Army regulations, and Task Order requirements
- Provide data center hardware and software necessary for integration, implementation, and operations of Army's Cloud Computing ecosystem per requirements of this contract and associated task orders
- Provide floor space and necessary data center power, connectivity, HVAC, and other services that will support a co-location of government owned equipment in the Contractor's data center
- Provide resources in commercial Tier 1, 2, 3, and/or 4 datacenters as defined by the Uptime Institute
- Operating environments provisioned in the vendors Tier 1, 2, 3 and/or 4 data centers shall be capable of meeting DoD Information Assurance requirements for Mission Assurance Category (MAC) 1, 2 or 3 including Classified, Sensitive and Public. The vendor is responsible for matching the appropriate facility, processes and procedures for the Operating Environment to be accredited through the operating system level. The Government applications owners will ensure that the individual applications are appropriately engineered to be hosted in the Operating Environments at the appropriate MAC level
- Government Furnished Equipment and Information
