Business challenge

To reduce costs, the City of Greater Dandenong began a review of cloud-based enterprise mobility management solutions to see if there was a better platform than the one it deployed four years ago.

Transformation

Governments worldwide face significant budgetary constraints. Working with Advent One, the City of Greater Dandenong in Australia reduced costs by replacing a legacy enterprise mobility management solution with a more cost-effective solution from IBM that addressed its content management, app deployment and security needs, and was easier to manage.

Business benefits

Reduced
total cost of ownership of enterprise mobility management platform

Improved
stability in the deployment of mobile updates

Enhanced
ease-of-use and manageability over legacy solution

City of Greater Dandenong

Gaining cost-effective enterprise mobility management with IBM

The City of Greater Dandenong has long been recognised as the capital of Melbourne's south-east region. With a thriving population of 140,000 people, Greater Dandenong is not only a vibrant and welcoming city, but it is also home to a thriving manufacturing and business sector. Locally, Greater Dandenong is an exciting multicultural community, with more than half of the city's residents born overseas. This diversity brings a wealth of culture, faith, language and knowledge, all of which are seen as a source of vitality and strength for the city.

Solution components

- IBM® MaaS360® Gateway Suite
- IBM MaaS360 Management Suite
- IBM MaaS360 Productivity Suite
- Solution delivered by IBM Business Partner Advent One

Statement of Good Security Practices: IT system security involves protecting systems and information through prevention, detection and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, misappropriated or misused or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service or security measure can be completely effective in preventing improper use or access. IBM systems, products and services are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective. IBM DOES NOT WARRANT THAT ANY SYSTEMS, PRODUCTS OR SERVICES ARE IMMUNE FROM, OR WILL MAKE YOUR ENTERPRISE IMMUNE FROM, THE MALICIOUS OR ILLEGAL CONDUCT OF ANY PARTY.
