Overview

IBM FlashSystem[®] and SVC models offer RJ45 adapters to use with 10/25 Gb Ethernet host bus adapters (HBAs) and multifiber push-on (MPO) connectors to use with 100 Gb Ethernet HBAs.

An additional SAN24B-6 switch option is also introduced for FlashSystem 9500R, replacing the existing b-type switch with an equivalent 32 GB model supported by IBM[®] Storage Expert Care.

Key requirements

For a comprehensive list of supported environments, devices, and configurations, go to the [IBM System Storage Interoperation Center](#).

Planned availability date

July 26, 2022.

Availability within a country is subject to local legal requirements.

Description

IBM FlashSystem 5015 and 5035 support RJ45 adapters for use with 10/25 Gb Ethernet HBAs, similar to other products in the FlashSystem family.

For IBM FlashSystem 7300, FlashSystem 9500, and SVC products, 1-meter to 25-meter MPO cables are being offered for use with the 100 Gb Ethernet HBAs, enabling clients the option of ordering them with the HBA rather than supplying their own.

An additional SAN24B-6 switch option is offered for FlashSystem 9500R, replacing the existing b-type switch with an equivalent 32 GB model, 8969-F24, which is supported by IBM Storage Expert Care. The level of Expert Care for this switch will, where possible, closely match the selected level of Expert Care on the FlashSystem 9500.

Accessibility by people with disabilities

Accessibility Compliance Reports (previously known as a VPAT) containing details on accessibility compliance to standards, including the Worldwide Consortium Web Content Accessibility Guidelines, European Standard EN 301 349, and US Section 508, can be found on the [IBM Accessibility Conformance Reports](#) website.

Publications

To order additional hardcopy publications for a fee or download free PDF format publications, go to the [IBM Publications Center](#) website.

IBM Documentation provides you with a single point of reference where you can access product documentation for IBM systems hardware, operating systems, and server software. Through a consistent framework, you can efficiently find information and personalize your access by going to [IBM Documentation](#) for all your product information needs.

To access the IBM Publications Center Portal, go to the [IBM Publications Center](#) website.

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. A large number of publications are available online in various file formats, which can currently be downloaded.

National language support

When available, translated product documentation can be found in the [IBM Support Portal](#).

Services

IBM Systems Lab Services

Systems Lab Services offers infrastructure services to help build hybrid cloud and enterprise IT solutions. From servers to storage systems and software, Systems Lab

Services can help deploy the building blocks of a next-generation IT infrastructure to empower a client's business. Systems Lab Services consultants can perform infrastructure services for clients online or onsite, offering deep technical expertise, valuable tools, and successful methodologies. Systems Lab Services is designed to help clients solve business challenges, gain new skills, and apply best practices.

Systems Lab Services offers a wide range of infrastructure services for IBM Power^(R) servers, IBM Storage systems, IBM Z^(R), and IBM LinuxONE. Systems Lab Services has a global presence and can deploy experienced consultants online or onsite around the world.

For assistance, contact Systems Lab Services at ibmsls@us.ibm.com.

To learn more, see the [IBM Systems Lab Services](#) website.

IBM ConsultingTM

As transformation continues across every industry, businesses need a single partner to map their enterprise-wide business strategy and technology infrastructure. IBM Consulting is the business partner to help accelerate change across an organization. IBM specialists can help businesses succeed through finding collaborative ways of working that forge connections across people, technologies, and partner ecosystems. IBM Consulting brings together the business expertise and an ecosystem of technologies that help solve some of the biggest problems faced by organizations. With methods that get results faster, an integrated approach that is grounded in an open and flexible hybrid cloud architecture, and incorporating technology from IBM Research^(R) and IBM Watson^(R) AI, IBM Consulting enables businesses to lead change with confidence and deliver continuous improvement across a business and its bottom line.

For additional information, see the [IBM Consulting](#) website.

IBM Technology Support Services (TSS)

Get preventive maintenance, onsite and remote support, and gain actionable insights into critical business applications and IT systems. Speed developer innovation with support for over 240 open-source packages. Leverage powerful IBM analytics and AI-enabled tools to enable client teams to manage IT problems before they become emergencies.

TSS offers extensive IT maintenance and support services that cover more than one niche of a client's environment. TSS covers products from IBM and OEMs, including servers, storage, network, appliances, and software, to help clients ensure high availability across their data center and hybrid cloud environment.

For details on available services, see the [Technology support for hybrid cloud environments](#) website.

IBM Expert Labs

Expert Labs can help clients accelerate their projects and optimize value by leveraging their deep technical skills and knowledge. With more than 20 years of industry experience, these specialists know how to overcome the biggest challenges to deliver business results that can have an immediate impact.

Expert Labs' deep alignment with IBM product development allows for a strategic advantage as they are often the first in line to get access to new products, features, and early visibility into roadmaps. This connection with the development enables them to deliver First of a Kind implementations to address unique needs or expand a client's business with a flexible approach that works best for their organization.

For additional information, see the [IBM Expert Labs](#) website.

IBM Security^(R) Expert Labs

With extensive consultative expertise on IBM Security software solutions, Security Expert Labs helps clients and partners modernize the security of their applications, data, and workforce. With an extensive portfolio of consulting and learning services, Expert Labs provides project-based and premier support service subscriptions.

These services can help clients deploy and integrate IBM Security software, extend their team resources, and help guide and accelerate successful hybrid cloud solutions, including critical strategies such as zero trust. Remote and on-premises software deployment assistance is available for IBM Cloud Pak^(R) for Security, IBM Security QRadar^(R)/QRoC, IBM Security SOAR/Resilient^(R), IBM i2^(R), IBM Security Verify, IBM Security Guardium^(R), and IBM Security MaaS360^(R).

For more information, contact Security Expert Labs at sel@us.ibm.com.

For additional information, see the [IBM Security Expert Labs](#) website.

IBM support

For installation and technical support information, see the [IBM Support Portal](#).

Additional support

IBM Client Engineering for Systems

Client Engineering for Systems is a framework for accelerating digital transformation. It helps you generate innovative ideas and equips you with the practices, technologies, and expertise to turn those ideas into business value in weeks. When you work with Client Engineering for Systems, you bring pain points into focus. You empower your team to take manageable risks, adopt leading technologies, speed up solution development, and measure the value of everything you do. Client Engineering for Systems has experts and services to address a broad array of use cases, including capabilities for business transformation, hybrid cloud, analytics and AI, infrastructure systems, security, and more. Contact Client Engineering at sysgarage@ibm.com.

Technical information

Specified operating environment

Hardware requirements

Go to the [IBM SSIC](#) website for the latest hardware requirements and compatibility information.

Software requirements

For a comprehensive list of supported environments, devices, and configurations, see the [IBM SSIC](#) website.

Planning information

Cable orders

Cables are required for the following:

- I/O connectivity to servers and fabric components
- Expansion enclosure attachment
- System management

As a convenience, a limited selection of cables can be ordered with SVC and FlashSystem products. See the [Product number](#) section for feature numbers.

Cables, along with installation services, are also available from IBM Network Integration and Deployment Services, an IBM Global Services offering.

I/O connectivity cables

Cables are required to connect the SVC and FlashSystem control enclosure I/O ports to server or fabric ports.

16/32 Gb FC: SVC and FlashSystem products require a 50.0/125 micrometer fiber optic cable terminated with an LC Duplex connector. The following can be ordered with SVC and FlashSystem control enclosure models:

- 1-meter OM3 fiber cable (LC)
- 2-meter OM3 fiber cable (LC)
- 5-meter OM3 fiber cable (LC)
- 10-meter OM3 fiber cable (LC)
- 25-meter OM3 fiber cable (LC)

10/25 Gb Ethernet: When using optical connectors, the SVC and FlashSystem control enclosures require 50.0/125 micrometer fiber optic cable terminated with an LC Duplex connector. The following fiber optic cables can be ordered with SVC and FlashSystem control enclosure models:

- 1-meter OM3 fiber cable (LC)
- 2-meter OM3 fiber cable (LC)
- 5-meter OM3 fiber cable (LC)
- 10-meter OM3 fiber cable (LC)
- 25-meter OM3 fiber cable (LC)

10/25 GbE ports can be used with a 10GBASE-T (RJ45), available to order with the SVC and FlashSystem control enclosure models

10/25 GbE and 100 GbE I/O ports can be used with client supplied active and passive cables as listed in the product documentation.

100 Gb Ethernet: When using QSFP28 optical connectors, SVC and FlashSystem control enclosures require OM3 or OM4 MPO fiber cables. The following cables can be ordered with SVC and FlashSystem control enclosure models.

- 1-meter OM3 MPO cable
- 5-meter OM3 MPO cable
- 10-meter OM3 MPO cable
- 25-meter OM3 MPO cable

System management cables

SVC and FlashSystem control enclosures requires a Category 5 or Category 5E Ethernet cable terminated with an 8P8C modular connector (RJ45 compatible connector). This cable is not available for ordering with the machine and must be supplied by the client.

Security, auditability, and control

The client is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communications facilities.

Terms and conditions

MES discount applicable

No

Field installable feature

Yes

Warranty period

- Machine type 2145: One year
- Machine type 2147: Three years
- Machine type 4666: One year
- Machine type 4657: One year
- Machine type 2072: Three years

Machine types 2145, 4666, and 4657 are provided with one year of standard warranty. Machine types 2147 and 2072 are provided with one year of standard warranty and two years of extended warranty service. Please consult with your advisors about the appropriate financial treatment for these products.

To obtain copies of the IBM Statement of Limited Warranty, contact your reseller or IBM. An IBM part or feature installed during the initial installation of an IBM machine is subject to the full warranty period specified by IBM. An IBM part or feature that replaces a previously installed part or feature assumes the remainder of the warranty period for the replaced part or feature. An IBM part or feature added to a machine without replacing a previously installed part or feature is subject to a full warranty. Unless specified otherwise, the warranty period, type of warranty service, and service level of a part or feature are the same as those for the machine in which it is installed.
