

# Simplify identity and access management (IAM) with cloud

**IBM Cloud Identity Services combines the rich functionality of enterprise-class IAM software with the ease and flexibility of the cloud.**

Core capabilities of IBM Cloud Identity Services include:

- Offload traditional deployment and management challenges of on-premise IAM
- Virtually eliminate hardware, software and maintenance costs associated with traditional deployments
- Enable “ready for use” services and automation technologies for rapid application integration
- Manage environment through an intuitive user interface

IBM’s multi-tenant public cloud service:

## Ready for cloud IAM?

Read the IBM Cloud Identity Services solution brief to find out how IBM can help you simplify and accelerate identity protection in the age of mobile, social and cloud.
