

IBM CERTIFIED PRE-OWNED POWER SYSTEMS

NOW IS THE TIME TO CUT COST AND UPGRADE YOUR POWER SYSTEM

IBM® Certified
Pre-owned
Equipment

- ✓ Are you running IBM hardware in your data center that are **over 5 years old**?
- ✓ Is technology upgrade not an option due to **budget constraint** or legacy application **OS constraint**?
- ✓ Do you know Power 5/6/7 are already “**end of service**” while Power7+ by Dec 2020?
- ✓ Are you paying **hefty maintenance charges** for older technology machines?

We have a solution for you.

IBM Certified Pre-Owned POWER8 servers tackle the need of maintaining legacy applications while continue to provide software & hardware maintenance with increased reliability and performance at significantly reduced TCO.

IBM Power8 Promo	Country	S822 (12core 128GB)	S824 (16core 256GB)	E850 (32core 512GB)
Power System w/ OS license & Power VM Enterprise Edition + SWMA & HWMA	Singapore	SGD 1,930/month	SGD 2,920/month	SGD 6,160/month
	Malaysia	MYR 4,400/month	MYR 6,700/month	MYR 14,200/month
	Philippines	PHP 65,000/month	PHP 97,000/month	PHP 218,100/month

*Price subject to changes, to be officially quoted upon request

Here's how IBM Certified Pre-Owned Power8 Systems help you meet these demands:

- POWER8 is the last technology to support IBM i v7.1 and native AIX v7.1
- **Consolidate** multiple Power7 servers into 1 Power8 server for cost savings
- Power8 is **40% processor performance** per core improvement versus Power7 and **100% improvement** over Power6
- **End-of-marketing** POWER8 available **through GARS is eligible for IBM Maintenance** without re-inspection

*IBM Certified Pre-owned Equipment is IBM hardware originally manufactured by IBM and refurbished or re-manufactured to original manufacturing specification using authentic Bill of Materials and access to serial number level maintenance records by IBM Global Asset Recovery Services (GARS). GARS issues assurance certification which entitles you the flexibility of using IBM maintenance without reinspection. We are the only predictable and stable supplier of POWER8 technology that has been tested to perform 'as new' by IBM.
