

IBM Security Expert Labs for Resilient

Let IBM Security Expert Labs' technical and domain subject matter experts help with use case development, solution design, configuration and enablement for IBM Security Resilient®.

Reduce Time to Deployment and Increase User Adoption

Get paired with a trusted advisor who has the expertise to help your organization execute on its objectives with threat management and incident response (IR). With IBM Security Expert Labs you can ensure that your IR processes are backed by cybersecurity expertise and industry best practices and that your team will be ready to respond both effectively and efficiently to potential threats.

Our Service Offerings

Getting Started Services

Use our team's SOAR expertise to guide and install your IBM Security Resilient deployment, train your teams and provide a rapid return on your investment.

Optimizing Incident Response

Let us provide a comprehensive review of your Resilient deployment, including thoughtful analysis of use cases to meet complex requirements and improve incident response automation.

Expanding Incident Response

Engage our expert Resilient resources to help define priorities and goals for improving incident response and refine processes and procedures.

Consultant on Demand

Get time with a consultant for anything related to Resilient. Pair with a Resilient subject matter expert to achieve your top goals, align with your use cases and educate your team.

Why Security Expert Labs?

Flexible Options

We can provide expert coverage for varying project needs including customer specific compliance, deployment reviews, architecture advice and optimization assistance.

Time to Value

Our team helps customers deploy faster, smarter and with more agility, so that you encounter fewer challenges and achieve product value more quickly.

Education and Support

In addition to providing hands on help with deployment or product expansion, we can also educate and support your team to help you achieve self-sufficiency.
