

IBM One Acquisition Solution for Integrated Services (OASIS) solutions

Providing time-saving, flexible contract terms for non-IT professional services

Highlights

- Reduces procurement processing and service deployment times as a General Services Administration (GSA)-approved provider
 - Delivers highly skilled, worldwide support for various professional, non-IT services
 - Offers flexibility and scalability to adjust services provided as your agency needs vary
-

The U.S. government's purchasing agent, the General Services Administration (GSA), strives to connect federal purchasers with the most cost-effective, high-quality commercial products and services. To help simplify the procurement process for federal agencies and employees, the GSA established the One Acquisition Solution for Integrated Services (OASIS) contract. The multiple award, indefinite delivery, indefinite quantity (IDIQ) contract provides U.S. government customers with flexible and innovative procurement solutions for complex professional, non-IT services.

The IBM OASIS services support the IDIQ contracts, providing authorized services in accordance with the U.S. GSA requirements. Our contract structure includes a 10-year period of performance, a 5-year base with a 5-year extension option, as the GSA directs. The OASIS contract helps prequalified contractors like IBM streamline delivery of comprehensive services solutions to federal agencies.

The contracts available through IBM to U.S. government customers span many areas of expertise and mission spaces. We offer the flexibility to provide services that adhere to various contract types, including hybrids and cost reimbursement, as well as ancillary support components and other direct charges (ODCs), at the task order level.

GSA awarded IBM contracts in the following OASIS pools:

- *Pool 1:* General Consulting Services in all OASIS focus areas except for Financial (Contract Number: GS00Q14OADU145)
- *Pool 2:* Financial Management Services (Contract Number: GS00Q14OADU224)
- *Pool 3:* Engineering for Military and Aerospace equipment and military weapons, Engineering for Marine Engineering and Naval Architecture, and Engineering for Contracts for engineering services awarded under National Energy Policy Act of 1992 (Contract Number: GS00Q14OADU342)
- *Pool 4:* Research and Development (R&D) in Biotechnology and R&D in Physical, Engineering and Life Sciences (Contract Number: GS00Q14OADU441)

Meeting key OASIS requirements

As a GSA-approved vendor, IBM® Global Business Services® is authorized to provide services to U.S. government agencies worldwide. Our depth and breadth of services capabilities allows us to quickly meet local, regional and global requirements. IBM provides streamlined, proven acquisition process, either through an agency's delegation of procurement authority (DPA) or regional GSA procurement support organization. We also provide the flexibility to support fixed price, time and materials and cost tasks contracts.

Global capabilities, professional resources

IBM's global teams of seasoned consultants and practitioners have the expertise to rapidly and efficiently address your non-IT service needs, wherever they are located. Our professionals are well-versed in the best practices of each of their areas of expertise. As a result, we deliver innovative, cost-effective solutions that address your department or agency needs.

IBM OASIS services solutions include:

- *Program management services*: leading, facilitating and ensuring the strategic planning, implementation, coordination, integration and evaluation of programmatic activities and administrative systems
- *Scientific services*: applying comprehensive scientific and professional knowledge for planning, conducting, evaluating and managing fundamental research, knowledge enhancement, and technology development and innovation
- *Logistics services*: managing the integration of information, transportation, inventory, warehousing, material handling, packaging, security and any other function necessary to the flow of resources
- *Management consulting services*: helping organizations improve performance, primarily by analyzing existing organizational problems and developing plans for improvement
- *Engineering services*: providing specialized knowledge in consulting, investigating, evaluating, planning and designing engineering principles
- *Financial management services*: planning, directing, monitoring, organizing and controlling an organization's monetary resources

Why IBM?

IBM is one of the largest public sector consulting firms, with over 2,000 employees focusing on the federal market within the scope of the GSA OASIS IDIQ contract. IBM's reach and support to the U.S. government is worldwide. IBM has the expertise and capacity to meet all U.S. federal agency needs.
