

“IBM is the only cloud service provider that can address our entire need.”

—Bjørnar Engebretsen, Chief Technology Officer, EVERY

Business challenge

To keep up with demand for cloud services, EVERY started to develop its own cloud infrastructure. Finding it a costly undertaking, the company sought a global cloud leader to help accelerate its transformation.

Transformation

Engaged in a 10-year cloud services contract, IBM is helping EVERY consolidate its infrastructure in a private IBM® Bluemix® environment and migrate customers to the platform. The Bluemix infrastructure integrates IBM Cloud Brokerage Services to provide EVERY customers with self-service access to additional cloud resources.
