Overview

IBM Cloud Pak^(R) for Data delivers updates to Data and AI offerings to allow new clients to take advantage of extensions for Cloud Pak for Data that include shared entitlement to both stand-alone and containerized deployments. This update also offers modernization upgrades to existing clients of IBM^(R) stand-alone products, allowing them to modernize existing workloads and receive an equal entitlement to Cloud Pak for Data Base functionality. These updates introduce several benefits to our clients, including the capability to:

- Deploy on any cloud with Red Hat^(R) OpenShift^(R) and gain cloud benefits
 - Modernize to a cloud-native architecture at their own pace
 - Leverage cloud-native benefits such as simplified provisioning, scaling, seamless upgrades, and consolidated management
 - Deploy and run faster with preconfigured templates on their choice of cloud
 - Add new users and resources easily with a scale-as-you-go approach
- Access premium functions that are available only through extensions of Data and AI offerings
- Integrate premium capabilities with Cloud Pak for Data base functionality
 - Unify user experience throughout products
 - Enhance each extension with unique synergies

The extensions and modernization upgrades are made available in this release for the following offerings:

- IBM Cognos^(R) Analytics
- IBM DataStage^(R) Enterprise
- IBM DataStage Enterprise Plus
- IBM Db2^(R)
- IBM Information Server
- IBM Informix^(R)
- IBM InfoSphere^(R) Master Data Management
- IBM Planning Analytics
- IBM Watson^(R) Studio Premium

Key requirements

Cloud Pak for Data is deployed on the Red Hat OpenShift Container Platform.

For details, see the [Cloud Pak for Data product hub](#).

Planned availability date

Description

Extensions and modernization upgrades for Cloud Pak for Data deliver shared entitlement and flexible workload modernization for Data and AI clients.

Extension features

An updated and standardized definition for Cloud Pak for Data Extensions ensures that every extension includes the same entitlements for new clients. The entitlements include:

- Shared entitlement for all extensions by enabling clients to run the premium service as a stand-alone offering on bare metal or as containerized software on Red Hat OpenShift and Cloud Pak for Data
- Cloud Pak for Data control plane for all extensions to make containerized software operational
- Updated pricing to include Cloud Pak for Data services and Red Hat OpenShift at a lower price

Modernization upgrade features

- Modernization upgrades offer a cost-effective way to deliver Cloud Pak for Data platform synergies while giving existing clients of stand-alone products time to modernize at a pace that works for their business
- Clients trade up their existing stand-alone offering to an extension and receive an equal entitlement to the base functionality of Cloud Pak for Data
- Clients have flexibility in allocating their entitlements
- Clients who are not ready to modernize legacy software may trade up their license entitlement to an extension and retain workloads on the stand-alone offering
- Clients receive an additional entitlement to Cloud Pak for Data of equal virtual processor cores (VPCs) in every scenario of a modernization upgrade
- Clients who are ready to modernize legacy software may trade up their license entitlement and gradually move workloads to the containerized extension
- Clients that do not plan to renew IBM Subscription and Support (S&S) for their stand-alone offering can get a predefined multiple of Cloud Pak for Data Enterprise Edition if they trade up their S&S instead
- Clients allocate their entitlement of their current offering for Cloud Pak for Data at a fixed ratio

Accessibility by people with disabilities

Accessibility Compliance Reports (previously known as a VPAT) containing details on accessibility compliance to standards, including the Worldwide Consortium Web Content Accessibility Guidelines, European Standard EN 301 349, and US Section 508, can be found on the [IBM Accessibility Conformance Report Request](#) website.

Cross-platform product for use on IBM Z

Order the part numbers that follow when the product is used for either the development of code that will be deployed on IBM Z or when the product will be communicating or transferring data between a distributed server and a IBM Z. Otherwise order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available through Passport Advantage.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

Software Maintenance

Licenses under the IBM International Program License Agreement (IPLA) provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available. Two charges apply: a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

Follow-on releases, if any, may have updated terms. See the [License Information documents](#) website for more information.

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, see the [IBM Support Guide](#).

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of two years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect.

This technical support allows you to obtain assistance (by telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to versions, releases, and updates (CD releases, Long Term Support Releases or fixes) of the program. You will be notified, through an announcement letter, of discontinuance of support with six months' notice.

If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

For additional information on the IBM Software Support Lifecycle Policy, see the [IBM Software Support Lifecycle Policy](#) website.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Passport Advantage applies

Yes, information is available on the [Passport Advantage and Passport Advantage Express](#) website.

Software Subscription and Support applies

Yes. Software Subscription and Support, also referred to as Software Maintenance, is included with licenses purchased through Passport Advantage and Passport

Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance by telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, see the [IBM Support Guide](#). Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

Unless specified otherwise in a written agreement with you, IBM does not provide support for third-party products that were not provided by IBM. Ensure that when contacting IBM for covered support, you follow problem determination and other instructions that IBM provides, including in the [IBM Support Guide](#).

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, go to the [Passport Advantage and Passport Advantage Express](#) website.

Statement of good security practices

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
