At a glance

Using IBM[®] Envizi Sustainability Performance Management with IBM's broader AI-powered software, such as IBM Maximo[®] Application Suite, IBM Supply Chain Intelligence Suite, and IBM Environmental Intelligence Suite, can help enterprises automate the feedback generated between corporate environmental initiatives and the operational endpoints being used in daily business operations. This is a crucial step to move enterprises beyond reporting to performance, as it helps them share data for tracking purposes and identify assets where action can be taken to reduce future emissions. Envizi Sustainability Performance Management integrates with the following:

- Maximo Application Suite asset management solutions that help extend the life of an organization's critical assets and reduce environmental impact by providing intelligent asset management, monitoring, predictive maintenance, and reliability in a single solution.
- Supply Chain Intelligence Suite supply chain solutions that help gain supply chain visibility, cut waste by right-sizing inventory, reduce the carbon footprint of shipment and logistics, and ensure responsible sourcing with blockchain-based technology for traceability.
- Environmental Intelligence Suite that helps increase resiliency by assessing and planning for the impact of environmental conditions on an organization's operations, assets, and supply chains. Environmental Intelligence Suite uses advanced AI and weather technology from IBM, the most accurate forecasting provider globally.

Overview

Envizi Sustainability Performance Management is a cloud service that can help drive environmental performance management. Envizi Sustainability Performance Management can simplify the consolidation, analysis, and management of siloed data sources in conformity with internationally accepted reporting frameworks. These reporting frameworks include Global Reporting Initiative (GRI), Sustainability Accounting Standards Board (SASB), Carbon Disclosure Project (CDP), Global Real Estate Sustainability Benchmark (GRESB), Sustainable Finance Disclosure Regulation (SFDR), Taskforce on Climate-Related Financial Disclosures (TCFD), National Greenhouse and Energy Reporting (NGER), Streamlined Energy and Carbon Reporting (SECR), and Sustainable Development Goals (SDG).

Envizi Sustainability Performance Management can also help you manage various stakeholders' interests and concerns as they relate to energy usage and Greenhouse Gas (GHG) emissions, as well as help you meet sustainability goals. Envizi Sustainability Performance Management can integrate data and reports into corporate-wide sustainability initiatives.

Envizi Sustainability Performance Management can help accomplish the following:

- **Monitor** . Envizi Sustainability Performance Management provides data management across 500 data types, with over 600 connectors, to gather data from your existing systems of records, devices, and electric and gas meters from your facilities.
- **Measure** . Envizi Sustainability Performance Management helps you link Environmental, Social, and Governance (ESG) projects to your environmental key performance indicators (KPIs). Using industry benchmarks, you can set your own carbon reduction goals.
- **Report** . Envizi Sustainability Performance Management provides dashboards and other configurable tools, which can empower your organization to customize its displays and help monitor the enterprise down to the asset. The reporting tools conform to major carbon reporting frameworks.
- **Gain insights** . Envizi Sustainability Performance Management can deliver analytics to assist in identifying faulty equipment or other trouble hot spots that, when addressed, may help reduce the carbon footprint. You can benefit from viewing your organization's performance versus expected outcomes either across the entire portfolio or at the asset level.

Key requirements

Envizi Sustainability Performance Management requires a supported browser and an internet connection.

Planned availability date

September 6, 2022

Availability within a country is subject to local legal requirements.

Description

Envizi Sustainability Performance Management offers a broad range of capabilities to help you drive environmental performance management and sustainability efforts for your organization. The services provided by Envizi Sustainability Performance Management are broken down into two categories:

- ESG and sustainability that can help you measure, monitor, and report on your progress toward goals against your targets
- Efficiency and decarbonization that can help you monitor assets across your organization's operations, and address performance concerns to help reduce emissions and drive toward efficiency targets

Features of ESG and sustainability service

Emissions management

- Scope 1 and 2 GHG Accounting and Reporting
 - Captures sustainability content across your organization and transforms it into a single system of record
 - Provides insights that can help you report on energy, carbon, environmental, and sustainability performance to both internal and external stakeholders

- Scope 3 GHG Accounting and Reporting
 - Calculates Scope 3 upstream and downstream GHG emissions across your organization, using methods in conformity with the GHG protocol
- Target Setting and Tracking
 - Captures and tracks sustainability performance against targets
 - Visualizes scenarios for future periods (years to decades) that look at business as usual versus targets versus incorporating impact of efficiency projects and renewables with a CO₂, energy, or cost lens

ESG reporting

- ESG Reporting Frameworks
 - Upgrades your numerical and qualitative ESG content from spreadsheets into a platform that can help you meet mandatory and voluntary reporting requirements by utilizing industry accepted reporting frameworks
- Building Ratings and Benchmarks
 - Captures your data related to building attributes and utility data
 - Calculates building ratings, benchmarks, and tracks performance towards established targets
 - Generates building rating information that conforms to Global Real Estate Sustainability Benchmark (GRESB), ENERGY STAR Portfolio Manager (ESPM), and others

ESG Performance

- Program Tracking
 - Provides the ability to track your ESG program's performance against your stated targets.
- Value Chain Surveys and Assessments
 - Enables the distribution of surveys to internal enterprise users and to third-party entities outside of your organization, where the third parties are typically suppliers across the supply chain or portfolio companies

Features of efficiency and decarbonization

Energy management

- Utility Bill Analytics
 - Leverages your utility billing content and provides analysis that can help you control energy cost and consumption, identify anomalies, and help you with informed decision-making for energy efficiency
- Interval Meter Analytics
 - Automates capture of your organization's high-resolution meter content and provides analytics and workflow tools to help your organization with its efficiency and decarbonization programs across facilities
- Renewable Asset Management
 - Provides a single system of record for your solar inverters, tracking solar-generated energy, consumed energy, and exported energy for reporting as well as emissions

Building optimization

- Asset Performance Management
 - Monitors and analyzes equipment and building environmental data from Internet of Things (IoT) sensor networks installed across your portfolio of sites to improve maintenance productivity and optimize energy efficiency
- Heating, ventilation, and air-conditioning (HVAC) Fault Detection

- Automatically detects and diagnoses faults and energy efficiency opportunities in your HVAC systems with building fault detection and diagnostics to minimize utility costs and reduce emissions

Accessibility by people with disabilities

Accessibility Compliance Reports (previously known as a VPAT) containing details on accessibility compliance to standards, including the Worldwide Consortium Web Content Accessibility Guidelines, European Standard EN 301 349, and US Section 508, can be found on the [IBM Accessibility Conformance Report Request](#) website.

Services

IBM Systems Lab Services

Systems Lab Services offers infrastructure services to help build hybrid cloud and enterprise IT solutions. From servers to storage systems and software, Systems Lab Services can help deploy the building blocks of a next-generation IT infrastructure to empower a client's business. Systems Lab Services consultants can perform infrastructure services for clients online or onsite, offering deep technical expertise, valuable tools, and successful methodologies. Systems Lab Services is designed to help clients solve business challenges, gain new skills, and apply best practices.

Systems Lab Services offers a wide range of infrastructure services for IBM Power^(R) servers, IBM Storage systems, IBM Z^(R), and IBM LinuxONE. Systems Lab Services has a global presence and can deploy experienced consultants online or onsite around the world.

For assistance, contact Systems Lab Services at ibmsls@us.ibm.com.

To learn more, see the [IBM Systems Lab Services](#) website.

IBM ConsultingTM

As transformation continues across every industry, businesses need a single partner to map their enterprise-wide business strategy and technology infrastructure. IBM Consulting is the business partner to help accelerate change across an organization. IBM specialists can help businesses succeed through finding collaborative ways of working that forge connections across people, technologies, and partner ecosystems. IBM Consulting brings together the business expertise and an ecosystem of technologies that help solve some of the biggest problems faced by organizations. With methods that get results faster, an integrated approach that

is grounded in an open and flexible hybrid cloud architecture, and incorporating technology from IBM Research^(R) and IBM Watson^(R) AI, IBM Consulting enables businesses to lead change with confidence and deliver continuous improvement across a business and its bottom line.

For additional information, see the [IBM Consulting](#) website.

IBM Technology Support Services (TSS)

Get preventive maintenance, onsite and remote support, and gain actionable insights into critical business applications and IT systems. Speed developer innovation with support for over 240 open-source packages. Leverage powerful IBM analytics and AI-enabled tools to enable client teams to manage IT problems before they become emergencies.

TSS offers extensive IT maintenance and support services that cover more than one niche of a client's environment. TSS covers products from IBM and OEMs, including servers, storage, network, appliances, and software, to help clients ensure high availability across their data center and hybrid cloud environment.

For details on available services, see the [Technology support for hybrid cloud environments](#) website.

IBM Expert Labs

Expert Labs can help clients accelerate their projects and optimize value by leveraging their deep technical skills and knowledge. With more than 20 years of industry experience, these specialists know how to overcome the biggest challenges to deliver business results that can have an immediate impact.

Expert Labs' deep alignment with IBM product development allows for a strategic advantage as they are often the first in line to get access to new products, features, and early visibility into roadmaps. This connection with the development enables them to deliver First of a Kind implementations to address unique needs or expand a client's business with a flexible approach that works best for their organization.

For additional information, see the [IBM Expert Labs](#) website.

IBM Security^(R) Expert Labs

With extensive consultative expertise on IBM Security software solutions, Security Expert Labs helps clients and partners modernize the security of their applications, data, and workforce. With an extensive portfolio of consulting and learning services, Expert Labs provides project-based and premier support service subscriptions.

These services can help clients deploy and integrate IBM Security software, extend their team resources, and help guide and accelerate successful hybrid cloud solutions, including critical strategies such as zero trust. Remote and on-premises software deployment assistance is available for IBM Cloud Pak^(R) for Security, IBM Security QRadar^(R)/QRoC, IBM Security SOAR/Resilient^(R), IBM i2, IBM Security Verify, IBM Security Guardium^(R), and IBM Security MaaS360^(R).

For more information, contact Security Expert Labs at sel@us.ibm.com.

For additional information, see the [IBM Security Expert Labs](#) website.

Technical information

Specified operating environment

Software requirements

For optimal performance of the capabilities within Envizi Sustainability Performance Management, one of the following browsers is recommended:

- Mozilla Firefox 75, or later
- Google Chrome 81, or later
- Microsoft™ Edge 17, or later
- Apple Safari 11, or later

IBM Support

[IBM Support](#) is your gateway to technical support tools and resources that are designed to help you save time and simplify support. IBM Support can help you find answers to questions, download fixes, troubleshoot, submit and track problem cases, and build skills. Learn and stay informed about the transformation of IBM Support, including new tools, new processes, and new capabilities, by going to the [IBM Support Insider](#).

Additional IBM support

IBM Client Engineering for Systems

Client Engineering for Systems is a framework for accelerating digital transformation. It helps you generate innovative ideas and equips you with the practices, technologies, and expertise to turn those ideas into business value in weeks. When you work with Client Engineering for Systems, you bring pain points into focus. You empower your team to take manageable risks, adopt leading technologies, speed up solution development, and measure the value of everything you do. Client Engineering for Systems has experts and services to address a broad array of use cases, including capabilities for business transformation, hybrid cloud, analytics and AI, infrastructure systems, security, and more. Contact Client Engineering for Systems at sysgarage@ibm.com.

Ordering information

For ordering information, consult your IBM representative IBM Business Partner, or see the [Passport Advantage/Passport Advantage Express Overview](#) web page.

These programs are available only through Passport Advantage.

These programs may only be sold directly by IBM or by IBM authorized Business Partners.

To locate an IBM Business Partners in your geography, see the [IBM Business Partner Directory](#) website.

Passport Advantage

New part numbers

There is no new ordering information in this release. As a convenience, the following table lists all currently available part numbers:

Part number description	Part number
IBM Envizi Sustainability Performance Management AppPoint per Month	D09SJZX
IBM Envizi Sustainability Performance Management AppPoint Overage	D09SKZX

Charge metric

The charge metrics for this cloud service can be found in the following Service Description document:

Program number	Service Description document title	Service Description document number
5900-API	IBM Envizi Sustainability Performance Management	i126-9385

Select your language of choice and scroll down to the Charge Metrics section.

Follow-on releases, if any, may have updated terms. See the [Cloud Services terms](#) website and search using the four-digit base Service Description number.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction for the acquisition of Cloud Services from IBM consist of either the IBM Cloud^(R) Services Agreement and the applicable offering Service Description or the IBM International Passport Advantage Agreement or the International Passport Advantage Express Agreement and the IBM Terms of Use - General Terms for Cloud Offerings and the applicable offering Service Description.

Technical support

Technical support is provided for Cloud Services and enabling software, as applicable, during the subscription period. Any enhancements, updates, and other materials provided by IBM as part of any such technical support are considered to be part of the Cloud Service, as applicable, and therefore governed by the applicable agreement as defined in Client's quote or transaction document. Technical support is included with the Cloud Service and is not available as a separate offering.

Additional technical support information for this Cloud Service offering may be found in the [IBM Support Guide](#) or in service-specific documentation.

Service Description

The following Service Description document applies to the offering in this announcement:

Program number	Service Description document title	Service Description document number
5900-API	IBM Envizi Sustainability Performance Management	i126-9385

Follow-on levels of this cloud service, if any, may have updated terms. See the [Cloud Services terms](#) website and search using the four-digit base Service Description number.

Limited warranty

See the warranty defined in the applicable agreement governing client's acquisition for this offering.

Money-back guarantee

No

Volume orders (IVO)

No

Passport Advantage applies

Yes, information is available on the [Passport Advantage/Passport Advantage Express Overview](#) website.

Educational allowance available

No

Statement of good security practices

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

Prices

For all local charges, contact your IBM representative.

Business Partner information

If you are an IBM Business Partner acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBMid and password are required to access the [Passport Advantage Online for IBM Resellers](#) web page or [Sell IBM products and services](#) website.

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or IBM Business Partner. Additional information is also available on the [Passport Advantage/Passport Advantage Express Overview](#) website.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified clients to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all client segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or go to the [IBM Financing](#) website for more information.

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates are based on a client's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, can help accelerate implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified clients.
