

*“It’s very easy for us to deliver a solution to a customer abroad with just a few clicks.”*

—Rotem Prizant, IBM SoftLayer Account Manager, Team

### Business challenge

To deliver agile, scalable hosting resources to its customer base, Team wanted to work with a trusted cloud services provider offering global infrastructure.

### Transformation

Team chose cost-effective SoftLayer cloud technology, provisioning infrastructure in Milan, Italy; Sydney, Australia; Frankfurt, Germany; Dallas, Texas; and Washington, DC to support customers worldwide.

### Results

With the SoftLayer solution, Team avoids capital investments in infrastructure, accelerates time to market, and flexibly meets customer demands for public, private and dedicated hosting environments.

## Business benefits

**Offers flexible provisioning**  
options for a wide range of customer needs, including public, private and dedicated hosting environments

**Avoids capital investments**  
in data center infrastructure with flexible cloud hosting resources

**Speeds time to market**  
with infrastructure provisioning in hours instead of weeks

# Team

## Speeding time to market with global SoftLayer cloud hosting resources

Founded in 1973, Team merged with several other technology leaders in 2013 to become Israel's largest IT services group. The IBM Advanced Business Partner has approximately 1,100 employees and offers enterprise customers a wide range of IT services, including network, security and system solutions.
