

# The Met Office helps companies succeed, come rain or shine

The Met Office deployed a hybrid cloud infrastructure combining IBM Z servers running Linux and IBM Storage solutions with public cloud services. Now, it can deliver meteorological data to clients fast while keeping costs low.

## 300+ million

weather observations ingested per day

Offers clients accurate, timely weather forecasts

## £200k

Avoided £200,000 spend thanks to efficiencies enabled by IBM solutions
