

# IBM Security Expert Labs for Guardium

Protect data, reduce complexity and improve outcomes by pairing IBM Security Guardium and IBM Security Expert Labs. Let our team of product and technical experts take your Guardium deployment to the next level.

## Reduce Time to Deployment and Increase User Adoption

Get paired with a trusted advisor who has the expertise to help your organization execute on its objectives with data protection and digital trust. When you engage with our team, we can help you implement a stable and scalable architecture, protect your business from data risk, and maintain a solid compliance solution.

### Our Service Offerings

#### Getting Started Services

Our expert consultants know the ins and outs of the Guardium data protection portfolio, which makes Security Expert Labs a natural partner to deploy your Guardium solution.

#### Optimizing Data Security

Our team can provide a comprehensive review of your Guardium deployment, including in-depth analysis and actionable recommendations on architecture, configuration and monitoring.

#### Expanding Data Security

Quickly engage expert Guardium resources to optimize, tune, upgrade, migrate or expand your deployment to increase peace of mind that your data is protected.

#### Consultant on Demand

Receive time with a consultant for anything related to Guardium. Pair with a Guardium subject matter expert to achieve your top goals, align with your use cases and train your team.

### Why Security Expert Labs?

#### Flexible Options

We can provide expert coverage for varying project needs, including customer specific compliance, deployment reviews, architecture advice and optimization assistance.

#### Time to Value

Our team helps customers deploy faster, smarter and with more agility, so that you encounter fewer challenges and achieve product value more quickly.

#### Education and Support

In addition to providing hands on help with deployment or product expansion, we can also educate and support your team to help you achieve self-sufficiency.
