NSF/ANSI Standard for Environmental Leadership and Corporate Social Responsibility Assessment of Servers

The NSF ANSI 426-2019 standard Environmental Leadership and Corporate Social Responsibility Assessment of Servers defines environmental and corporate social responsibility performance criteria for computer servers.

In compliance with this standard, IBM Global Asset Recovery Services offers return services for clients in the US and Canada for IBM® Power Systems™ servers that have been certified to this standard.

For assets without market value, a fee is charged for recycling at end of product life cycle.

Please contact your local IBM Global Asset Recovery Services team at <http://www.ibm.com/ibm/recycle/ww> for more information.

Many local and national jurisdictions require no-charge product recycling programs for certain electronic equipment. Information on IBM product take back for recycling programs can be found at <http://www.ibm.com/ibm/recycle/ww>.
