Optimize your imaging environment through a hosted IBM private cloud

Hosted Enterprise Imaging on IBM Private Cloud

As an IBM customer, you may be seeking to optimize your imaging platform and successfully refocus your resources on infrastructure support. To do this, you need a trustworthy hosted service provider that offers an operational expenditure (OpEx) model and extensive resources.

Hosted enterprise imaging on IBM's private cloud has the robust architecture and security-rich features that help promote business resilience and meet the needs of your growing infrastructure. This solution helps you support current and new workloads with an agile, configurable, infrastructure featuring some of the latest hardware and software and the ability to scale as needed.

Supports growth through a more agile IT infrastructure

IBM offers the agility, efficiency and scalability to address your growing framework and support requirements. Additionally, the managed cloud hybrid model allows you to move workloads into the cloud to fit your business needs.

Can lower IT costs through an OpEx model

Shifting your IBM resources from a capital expenditure (CapEx) to an operational expenditure (OpEx) model lets you avoid a large capital investment in IT infrastructure.

Supported by highly skilled experts

IBM can provide the multiple infrastructure skills needed to manage your environment. This dedicated support, in existing IBM data centers, allows for nearly continuous business readiness by providing standard hosted services, such as monitoring, system support and backup management, to enable nearly always-on service for your imaging applications.

* Based on client engagements and not a guarantee of future performance

Benefits of a hosted cloud environment

- Meet uptime and SLA requirements today with a HIPAA-ready hosted cloud service that provides maximum security

- Reduce time-to-market and easily connect distributed, cross-disciplinary teams while improving effectiveness and efficiency at scale

- Lessen the demand on the local IT resources, freeing them for new, revenue generating projects

- Experience peace of mind with a built-in, high-availability geo-dispersed environment that mitigates the impact of a prolonged interruption

- Application life cycle management with consultative training and best practices to unlock the power of each release

Hosted Enterprise Imaging on IBM Private Cloud Solutions

IBM iConnect® Enterprise Archive

Enable the storage, management and sharing of all DICOM, non-DICOM images from disparate PACS, specialties and service lines.

IBM iConnect® Access

Share and exchange images with a zero-download web viewer across the enterprise and Community. *

Merge PACS™

Improve reading workflows anywhere in the enterprise. It is not just a high-performance viewer, but a versatile platform that can simplify physicians' reading activities and ease access to patient data.**

*IBM iConnect Access is not FDA-cleared for diagnostic use on mobile devices
