

Gala Leisure achieved

57%
better
performance

52%
less costs

98%
reduction in
floor space

with All Flash storage.

So can you. Learn how.

Burdened with an inherited, oversized IT infrastructure

During the split from their parent company in 2015, Gala Leisure, a top bingo operator in UK inherited an IT infrastructure which was:

The transformation journey: choosing virtualized storage customized for them

Gala Leisure wanted a storage solution that could cut costs, boost efficiency and integrate with its existing equipment. They opted for a flash storage solution from IBM with:

Seamless integration with existing storage devices

using IBM FlashSystem V9000.

Sophisticated virtualization and management capabilities

using IBM SAN Volume Controller built with IBM Spectrum Virtualize™.

High performance and efficiency

using VersaStack solutions combining Cisco UCS Integrated Infrastructure with IBM Storwize.

A solid IT foundation for growth with IBM FlashSystem

The rapid, flexible and high-performance storage solution from IBM with sophisticated virtualization and management capabilities enabled Gala Leisure to achieve:

57% boost in application performance

98% reduction in required floor space

52% cut in storage support and operational costs

“With the IBM storage solution in place, we now have higher storage performance combined with lower operational and support cost—enabling Gala Leisure to continue its next phase with a solid IT foundation.”

- Daniel Askin, Solutions Architect, Gala Leisure IT
