

How can government organizations deliver secure, reliable, cost-effective services?

[Read the full story](#)

IBM Z
Government

To boost the cost-efficiency of the IT infrastructure that supports judicial and administrative processes across Virginia's Judiciary, SCVA decided to consolidate and simplify its IBM Z® mainframe application infrastructure.

With Vicom Infinity and IBM, SCVA migrated to an IBM z14® Model ZR1, delivering the capacity and performance to consolidate its multi-system footprint to a single frame using IBM z/VSE®, IBM z/VM® and Linux.

The compact 19-inch rack size of IBM z14 Model ZR1 optimizes use of limited data center floorspace

"There's so much growth potential in the z14 that we believe it will support our needs for many years to come."

- Mike Riggs
Director of Judicial Information Technology
