

IBM Services

IBM Success Factors Enterprise Platform as a Service

Restructure the way you look at operational expenses

Experience an end-to-end, consult to operate model which can include business case development, implementation services, software resell, business partner managed cloud (PMC), IBM SAP SuccessFactors Continuum and business process outsourcing services.

With the IBM Services® approach to enterprise platform as a service, we work with you to put people at the center of everything you do. By evaluating your human capital management operating model, our experts can help your organization realize performance excellence, improve processes and accelerate implementations at virtually any stage of the journey through the following options:

Capital lease

If you don't own any software or infrastructure, we help provide a true enterprise platform as a service using an SAP partner managed cloud. We can also deploy application management services and tier 1 and 2 call center support.

Solution-based

With this approach, we work with you directly to help resell new licenses and restructure software maintenance agreements. In addition, we can deliver application management services and tier 1 and 2 call center support for new and traditional applications. As a result, financing for this option is designed to distribute cash flow monthly across a five-year period.

Capital project

We'll collaborate with you to help design and implement a five-year capital project with flexible payment options, which can be set up as multiple installments for software and maintenance.

While broken down into three separate options, we can combine different elements of the capital lease, solution-based or capital product approach to create hybrid options designed to meet your unique needs.

IBM Success Factors Enterprise Platform as a Service is designed to provide these benefits:

Strategic business partner

Supplier consolidation

Standardized services

Operational efficiency

Value-add services

Why IBM?

IBM puts the power of innovative technology to work to help modernize and reinvent human resources. With trusted expertise and innovative practices, we can transform multinational organizations through ongoing strategic consulting services.
