

The Cognitive Enterprise

Powered by IBM RapidMove for Oracle Cloud

A new era of business reinvention is dawning. Organizations are facing an unprecedented convergence of technological, social and regulatory forces. As artificial intelligence (AI), automation, Internet of Things (IoT), blockchain and 5G become pervasive, their combined impact will reshape standard business architectures.

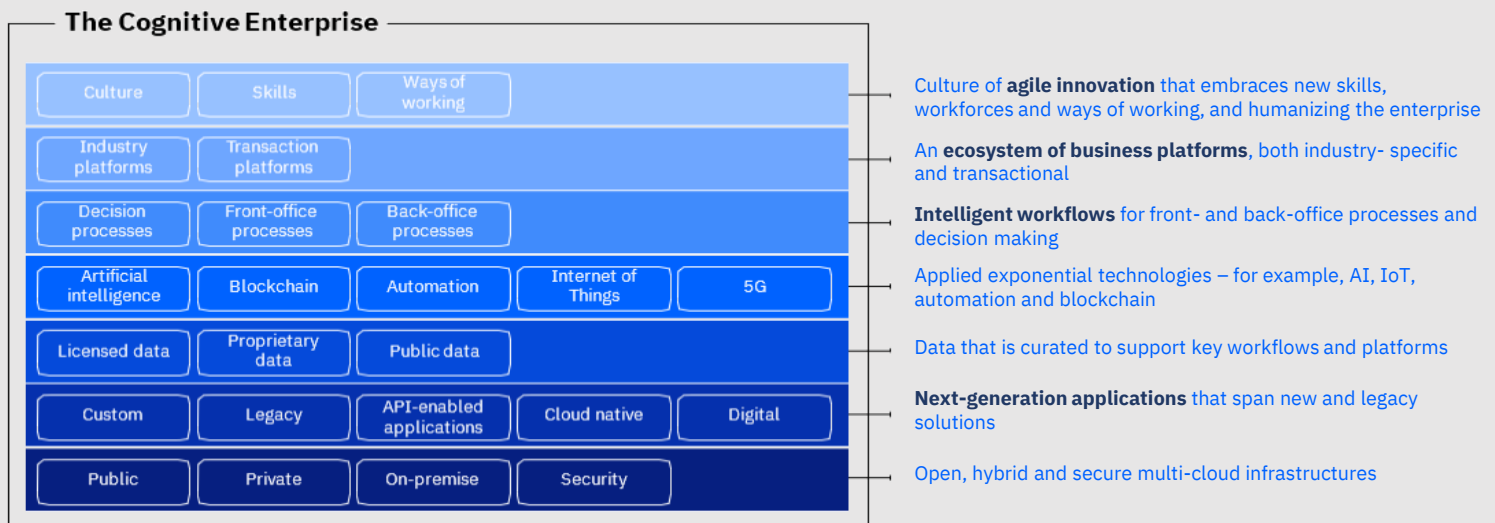

The “outside-in” digital transformation of the past decade is giving way to the “inside-out” potential of data exploited with these exponential technologies.

We call this next-generation business model the Cognitive Enterprise

Imagine the Cognitive Enterprise as composed of multiple business platforms. One or more of these acts as the core or primary platform(s), providing key differentiation.

The business platform is made up of capability layers. Each is subject to major transformation – **this is where organizations will orchestrate fundamental industry change**. Your company has the opportunity not only to attack and secure new markets, but also to restructure your cost bases for the long term – with a possible huge payoff to your bottom line.

We bring the Cognitive Enterprise to Oracle Customers....

IBM has developed proprietary and unique solutions to help bring the intelligent business platform to Oracle customers across Finance, Procurement & Human Capital Management.

Industries Supported

Banking

Energy & Utilities

Healthcare

Higher Education
