

Supply chain management (SCM) for cloud is here. Grab it.

IBM Services for Oracle SCM Cloud.

A simplified, accelerated path to cloud.

Oracle SCM Cloud and IBM unlock the ability to:

Centralize supply chain management processes so they can be accessed from any device.

Use Watson analytics to proactively identify trends and problems.

Provide the right level of bandwidth to support changes in demand.

Access updates more easily through the cloud.

Get started with the Journey to Oracle Cloud workshop.

We provide cloud strategy and adoption services and ROI case development to help strategize your unique path to cloud.
