

“As an early adopter of SoftLayer, we have leadership in the market.”
—Charles Musisi, Managing Director, Infinity Computers and Communications Company

Business challenge

Facing power supply and Internet access challenges, Infinity Computers and Communications Company (I3C) sought a reliable cloud solution to support internal operations and provide high-performance services to customers.

Transformation

I3C evaluated Microsoft, Huawei and SoftLayer® cloud offerings, choosing the SoftLayer platform based on performance, pricing, support and global data center presence. The firm provisioned hybrid infrastructure in SoftLayer data centers in Dallas, Texas, and Washington, DC, hosting customer e-commerce solutions on powerful bare metal servers. I3C anticipates extending its environment to SoftLayer locations in Europe as business demands.

Results

Designed for dependability, SoftLayer infrastructure provides the flexible hosting solution I3C needs to quickly and cost-effectively meet customer demands.

Business benefits

45% decrease
in operating expenses
with SoftLayer cloud resources available on demand

40% faster
deployment
with easy-to-provision cloud technology

40% less
cost for delivery
of solutions hosted in a SoftLayer environment

Infinity Computers and Communications Company

Gains competitive edge as the first in Uganda to offer SoftLayer hosting services

Launched in 2012 and located in Kampala, Uganda, I3C offers a comprehensive IT product and service portfolio. The business implements complex IT projects for banks, schools, government agencies and nongovernment organizations (NGOs).
