

“SoftLayer is the best platform to support our cloud strategy as an organization.”

—Gerald Gajdosik, Head of IT Operations, Austrian Post

Business challenge

To deliver services and meet business demands with greater agility, Austrian Post sought a scalable cloud platform with European data center presence and technology designed to easily integrate with existing infrastructure.

Transformation

Evaluating leading cloud solutions, IBM Premier Business Partner Pitagora Informationsmanagement GmbH found that the SoftLayer platform met Austrian Post’s performance and European hosting requirements, providing a flexible hybrid cloud infrastructure that scales as needed.

Results

With the SoftLayer hosting solution, Austrian Post accelerates infrastructure deployment, improves business agility and supports compliance with European data hosting regulations.

Business benefits

80%

faster deployment

of SoftLayer cloud servers compared with traditional infrastructure

Supports

regulatory compliance

with a SoftLayer hosting solution that keeps all data in Europe

Scales

for new business demands

with flexible hybrid infrastructure and fast, easy-to-provision resources

Austrian Post

Speeding deployment by 80 percent with SoftLayer cloud technology

Headquartered in Vienna, Austrian Post is Austria’s leading logistics and postal services provider. In addition to mail transport and delivery, the organization offers business and communications services to customers throughout the nation and operates subsidiaries in 12 European markets.
