Free up time, money and resources for innovation and growth

Embrace emerging technologies with Red Hat solutions

Standardize on the world's leading enterprise Linux platform[1]

At nearly all large enterprises across the nation, Red Hat Enterprise Linux is running the show. This strong and reliable operating environment can serve as your foundation for new applications, virtual machines and hybrid clouds. Red Hat makes open source enterprise ready through a unique development model to produce more innovative, iterative, stable and secure technologies.

95% of Fortune 500 firms rely on Red Hat® Enterprise Linux®[2]

Compared to unpaid alternatives, Red Hat solutions, including Red Hat Enterprise Linux:

Deliver higher value
573% three-year ROI[3]

Decrease overall costs
16% lower three-year cost of operations[3]

Strengthen security
65% faster identification of security risks[3]

Reduce downtime
81% less unplanned downtime[3]

Improve agility
35% faster development life cycles[3]

Boost productivity
32% more efficient IT infrastructure teams[3]

Automate mundane manual tasks

A critical piece of the modernization puzzle is Red Hat Ansible® Automation Platform. Ansible enables enterprises to automate applications and workloads on a myriad of hardware platforms. There's even pre-built, community-driven content available with Ansible that helps enterprises begin automating tasks right out of the box.

- **One of the largest open source communities in the world**
- **Huge library of community-contributed content**
- **A head start on faster rollout of new applications**
- **More time, money and resources for strategic initiatives**

Build and scale applications with confidence — we'll manage the rest

Red Hat OpenShift® is a Kubernetes distribution with enterprise-level security, stability and reliability. Build once and deploy anywhere through open, container-based platforms on the cloud vendors of your choice. With Red Hat OpenShift Managed Services, you'll have comprehensive support to help you manage risk, optimize outcomes and improve speed to market.

Red Hat OpenShift Managed Services

Faster time to value
Self-service dashboard provides fully managed clusters in minutes

Increased operational efficiencies
Flexible consumption-based pricing

Backed by 24x7 expert support
Financially backed 99.95% SLA

Available on every major public cloud

IBM Cloud   aws   Microsoft Azure   Google Cloud
