

URGENCY FOR TECHNOLOGY MODERNIZATION IN THE CANADIAN GOVERNMENT STUDY RESULTS

SEPTEMBER 2-10, 2021

KEY FINDINGS

1. Over nine in ten (93%) of Canadian IT decision makers are concerned, with 46% saying they are very concerned, about security risks and the potential impact of cybercrime in Canada.
2. Cybersecurity is seen as most critical to reducing government costs and improving delivery of services.
3. Nearly half of Canadian IT decision makers (49%) and government IT decision makers (47%) strongly agree that the federal government IT modernization efforts should be focused on security and data protection.
4. Around 60% of Canadian IT decision makers think it is very important for the federal government to modernize its technology and cloud infrastructure to protect the privacy of Canadians' personal data (64%) and for heightened cybersecurity (60%).
5. 50% of Canadian IT decision makers strongly agree cloud computing better helps modernize federal IT systems in terms of stronger cybersecurity. However, bureaucracy (67%), cost (65%), and party politics (65%) are seen as the greatest obstacles to technology/cloud modernization.

Methodology: This study was conducted by Morning Consult on behalf of IBM from September 2-10, 2021. The study was conducted among 250 IT decision makers in Canada, with 62 responses from current or former government IT decision makers. The study was conducted online. Results from the full survey have a margin of error of plus or minus 6 percentage points.

AGENDA

MODERNIZATION OF FEDERAL GOVERNMENT TECH

IMPACT OF TECH ON COST & DELIVERY OF SERVICES

CONCERNS AROUND CYBERCRIME

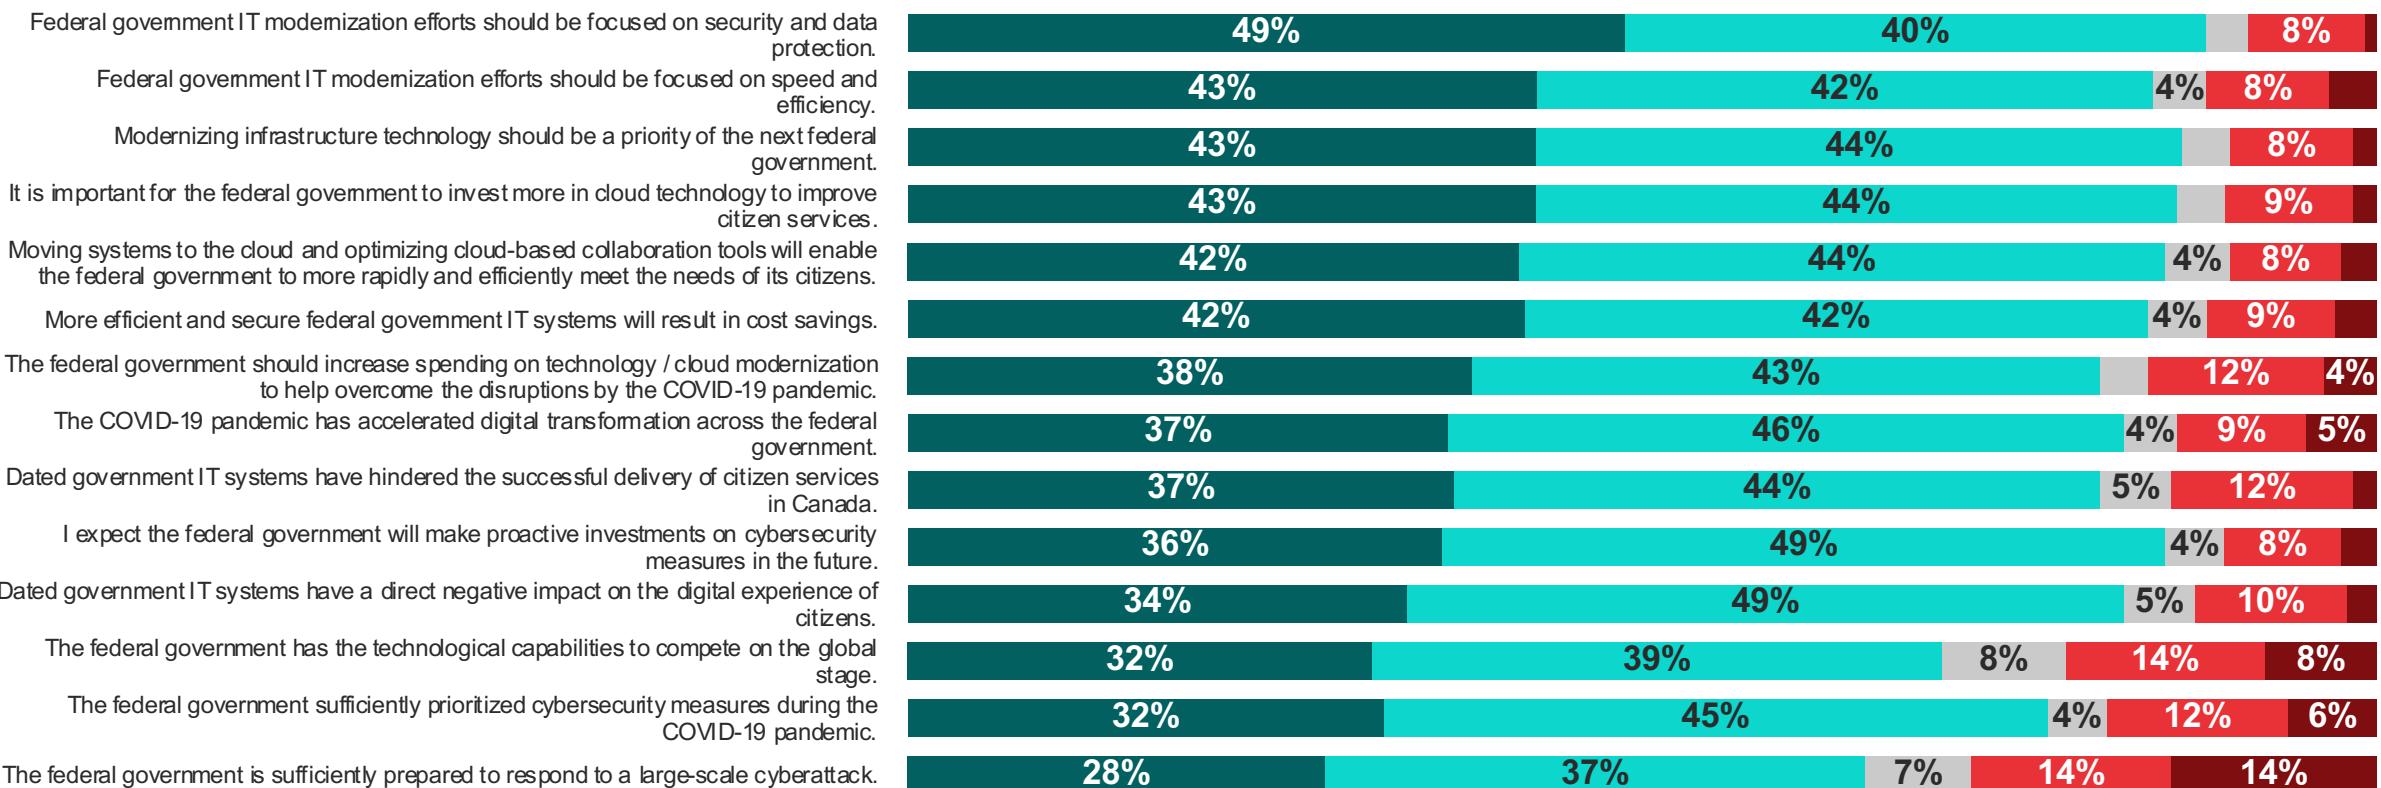

MODERNIZATION OF FEDERAL GOVERNMENT TECH

Nearly half (49%) of Canadian IT decision makers strongly agree federal government IT modernization efforts should be focused on security and data protection

To what extent do you agree or disagree with the following statements?

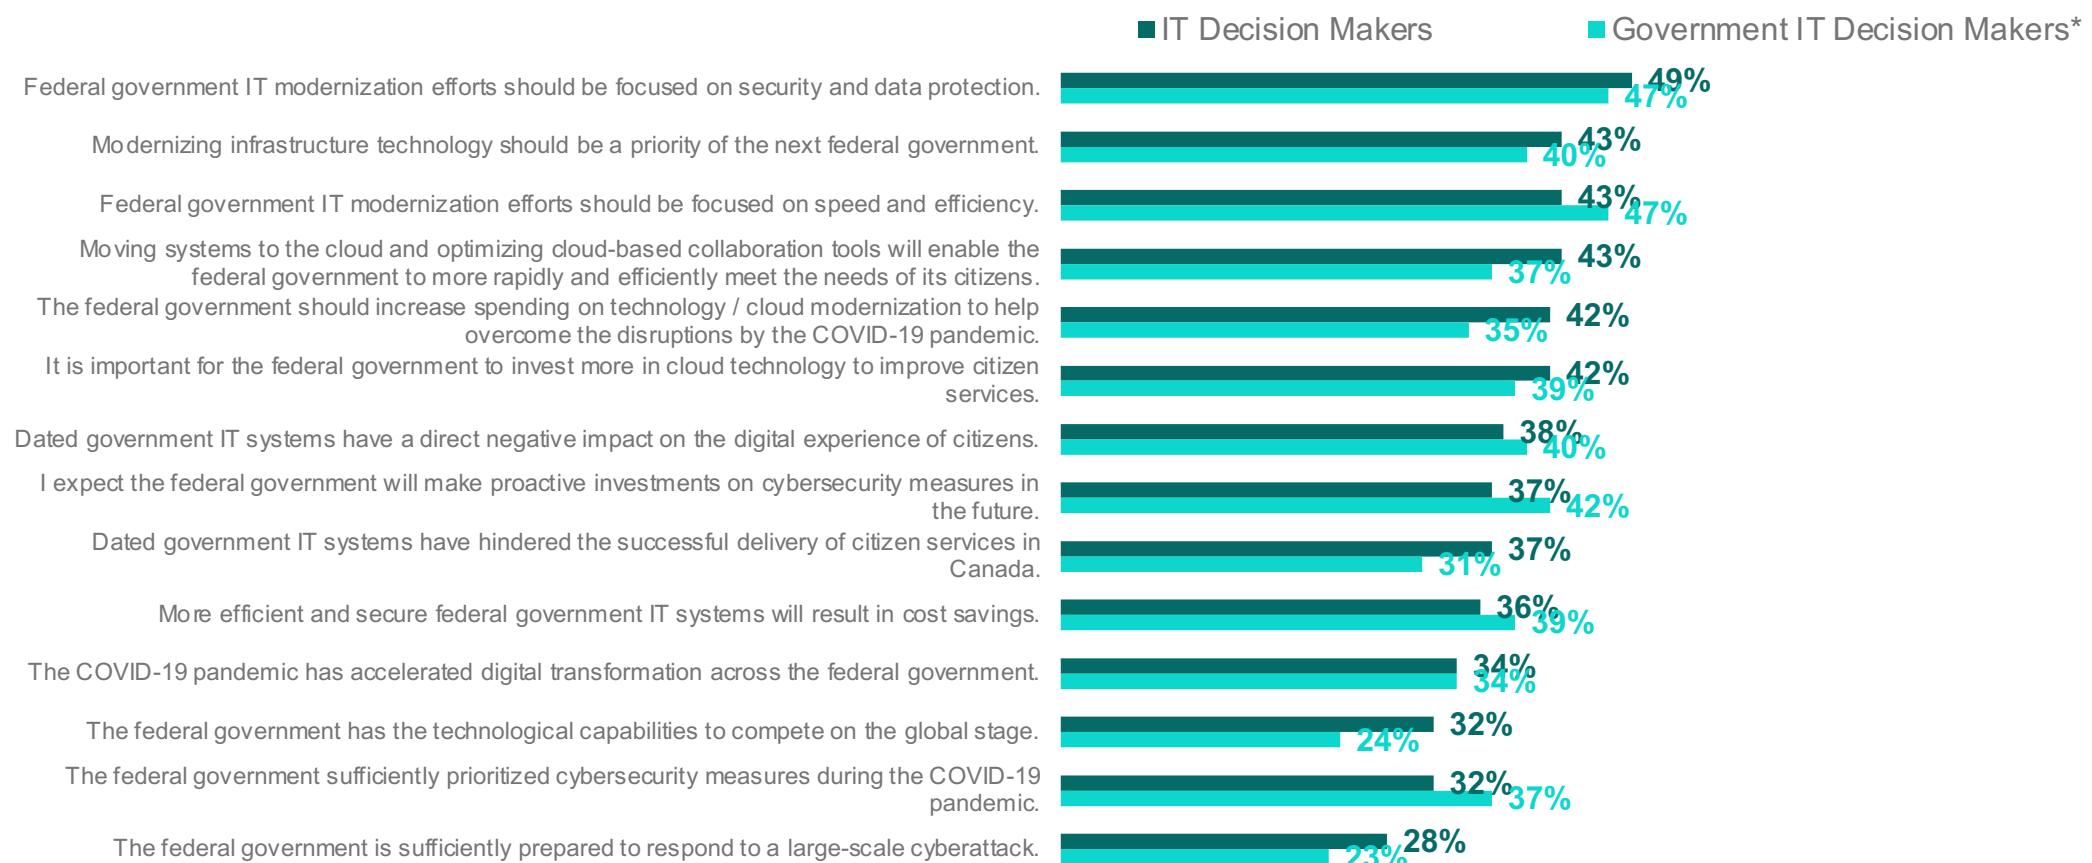

Strongly agree Somewhat agree Don't know/Not sure Somewhat disagree Strongly disagree

MODERNIZATION OF FEDERAL GOVERNMENT TECH

Nearly half of both Canadian IT decision makers (49%) and government IT decision makers (47%) strongly agree that the federal government IT modernization efforts should be focused on security and data protection

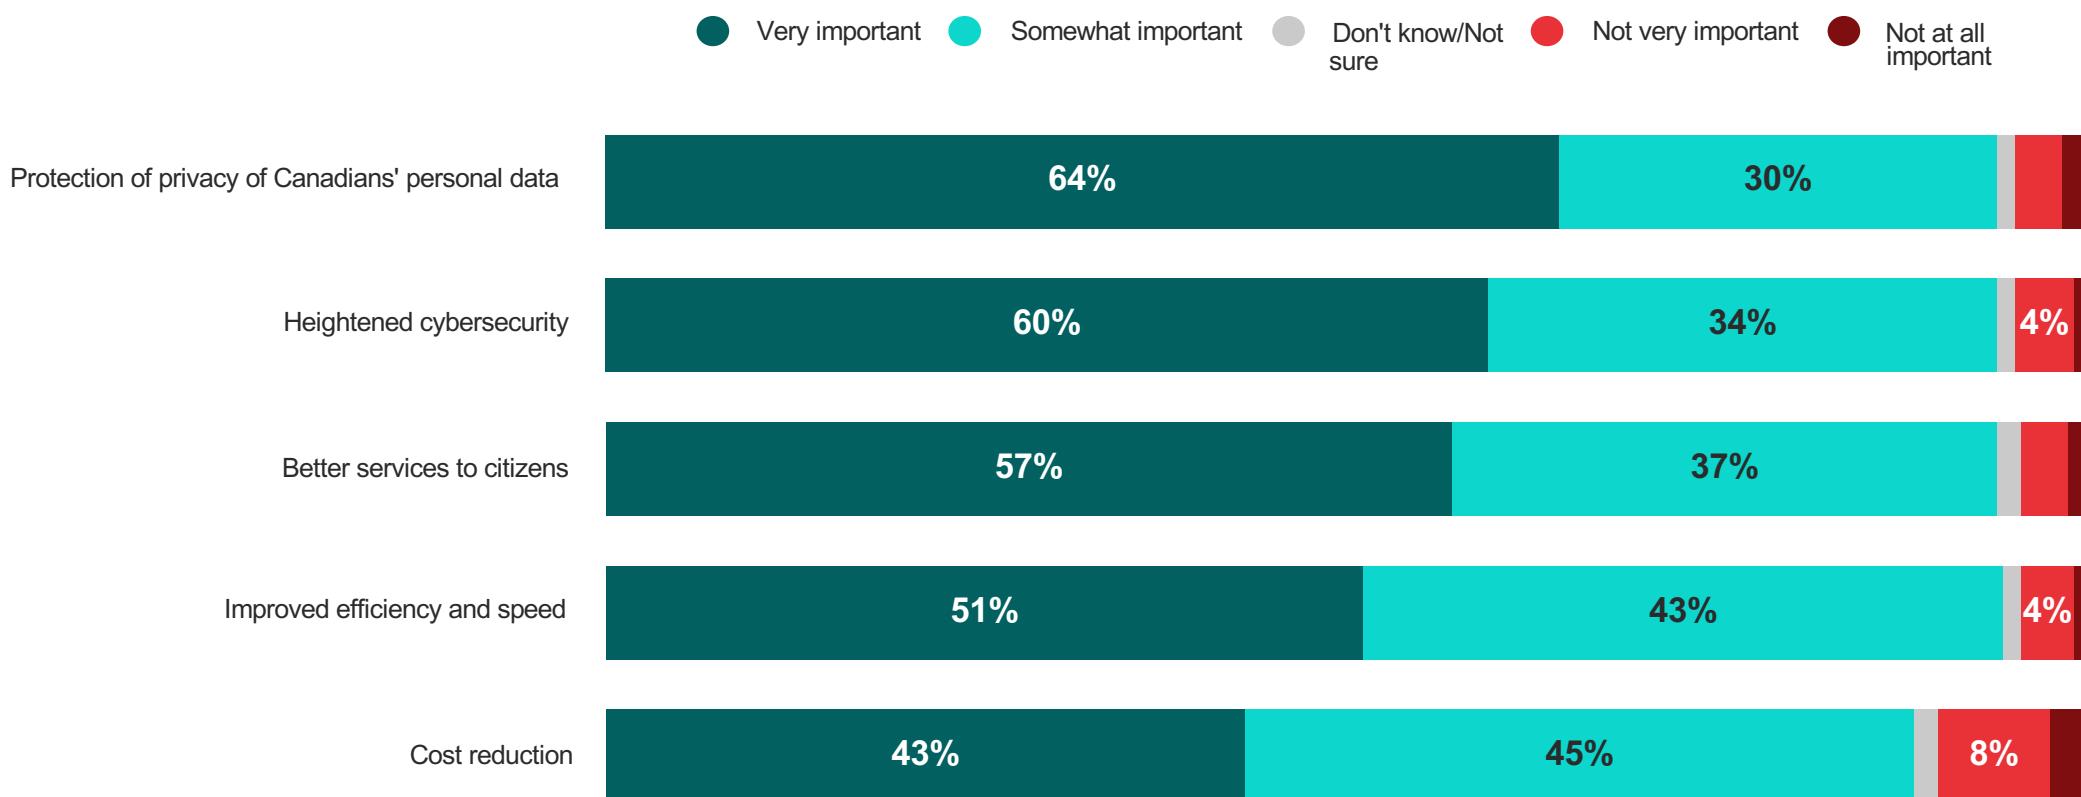

To what extent do you agree or disagree with the following statements? **[Showing % Strongly agree]**

MODERNIZATION OF FEDERAL GOVERNMENT TECH

Around 60% of Canadian IT decision makers think it is very important for the federal government to modernize its technology and cloud infrastructure to protect the privacy of Canadians' personal data (64%) and for heightened cybersecurity (60%)

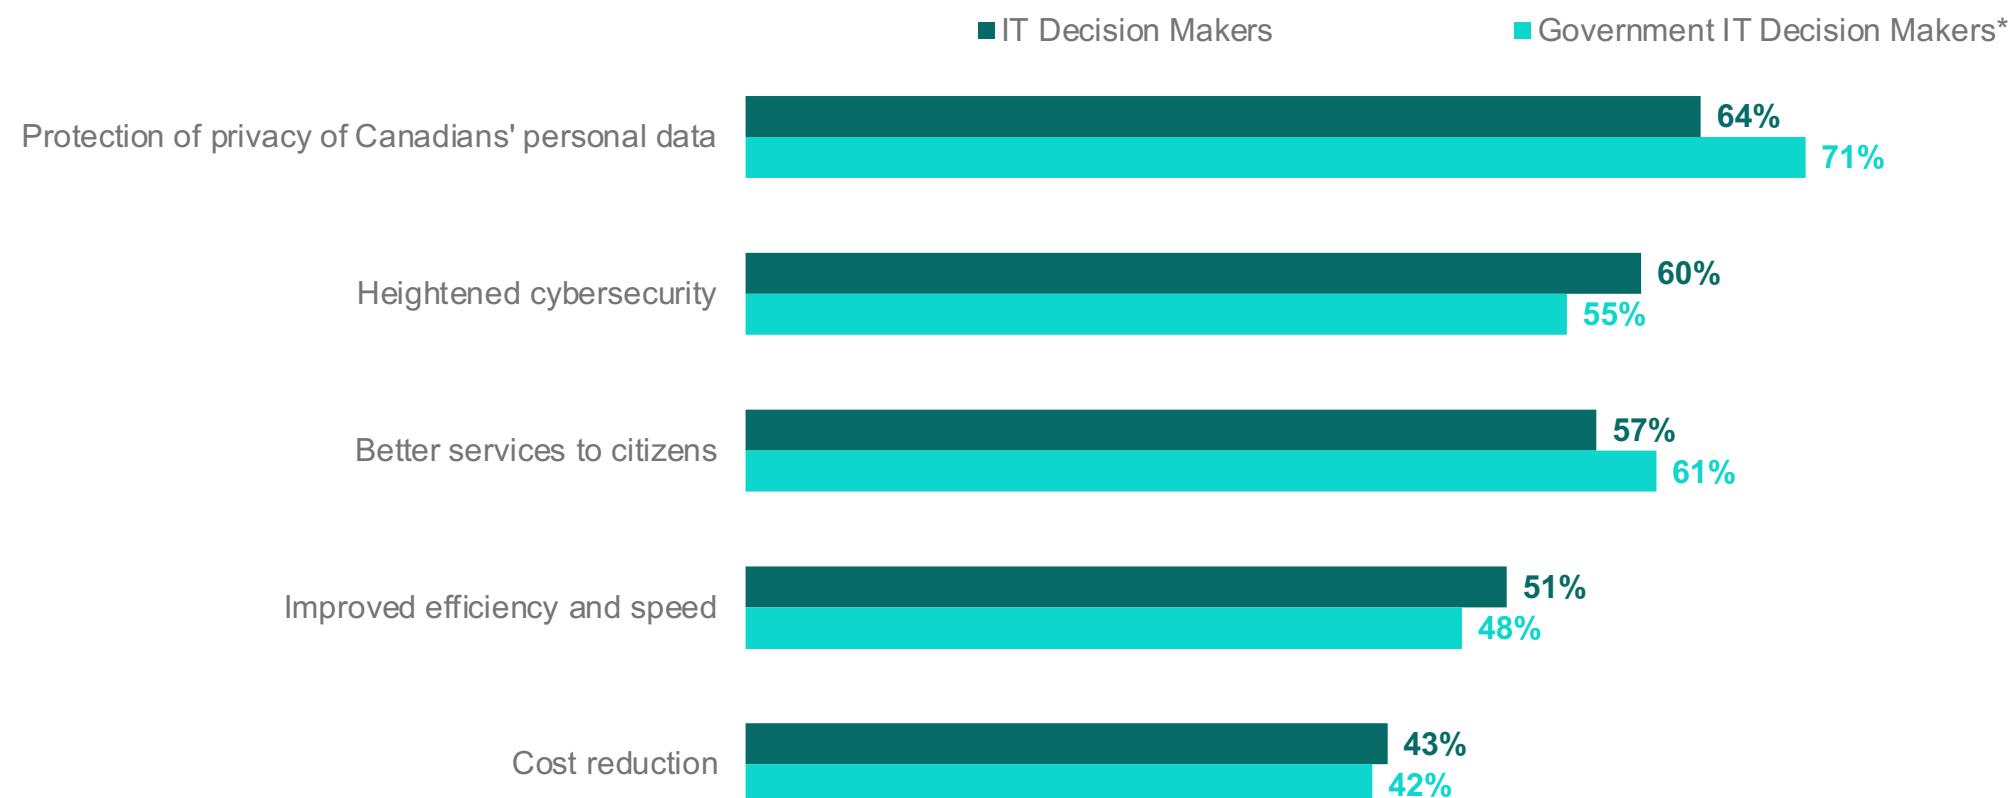

How important do you think it is for the federal government to modernize its technology and cloud infrastructure to achieve the following?

MODERNIZATION OF FEDERAL GOVERNMENT TECH

A majority of Canadian IT decision makers and government IT decision makers think it is very important for the federal government to modernize its technology and cloud infrastructure to achieve protection of privacy of Canadians' personal data, heightened cybersecurity, and better services to citizens

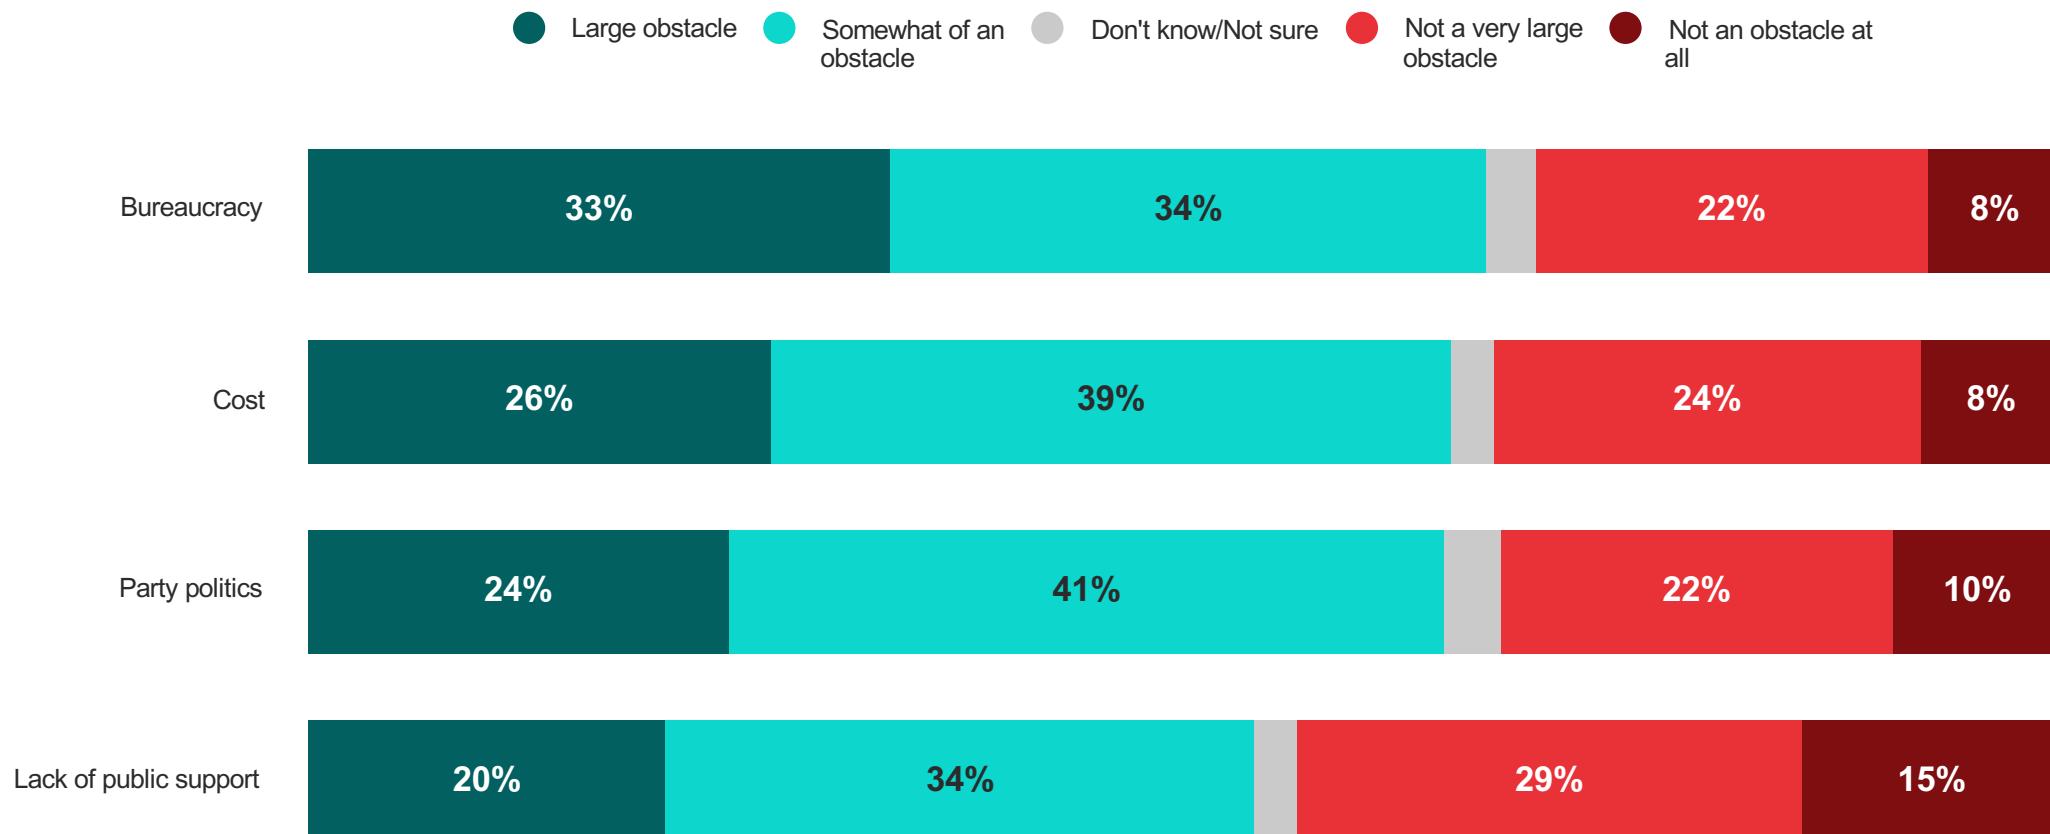

How important do you think it is for the federal government to modernize its technology and cloud infrastructure to achieve the following? **[Showing % Very important]**

MODERNIZATION OF FEDERAL GOVERNMENT TECH

About two thirds of Canadian IT decision makers think bureaucracy (67%), cost (65%), and party politics (65%) are obstacles to technology/cloud modernization

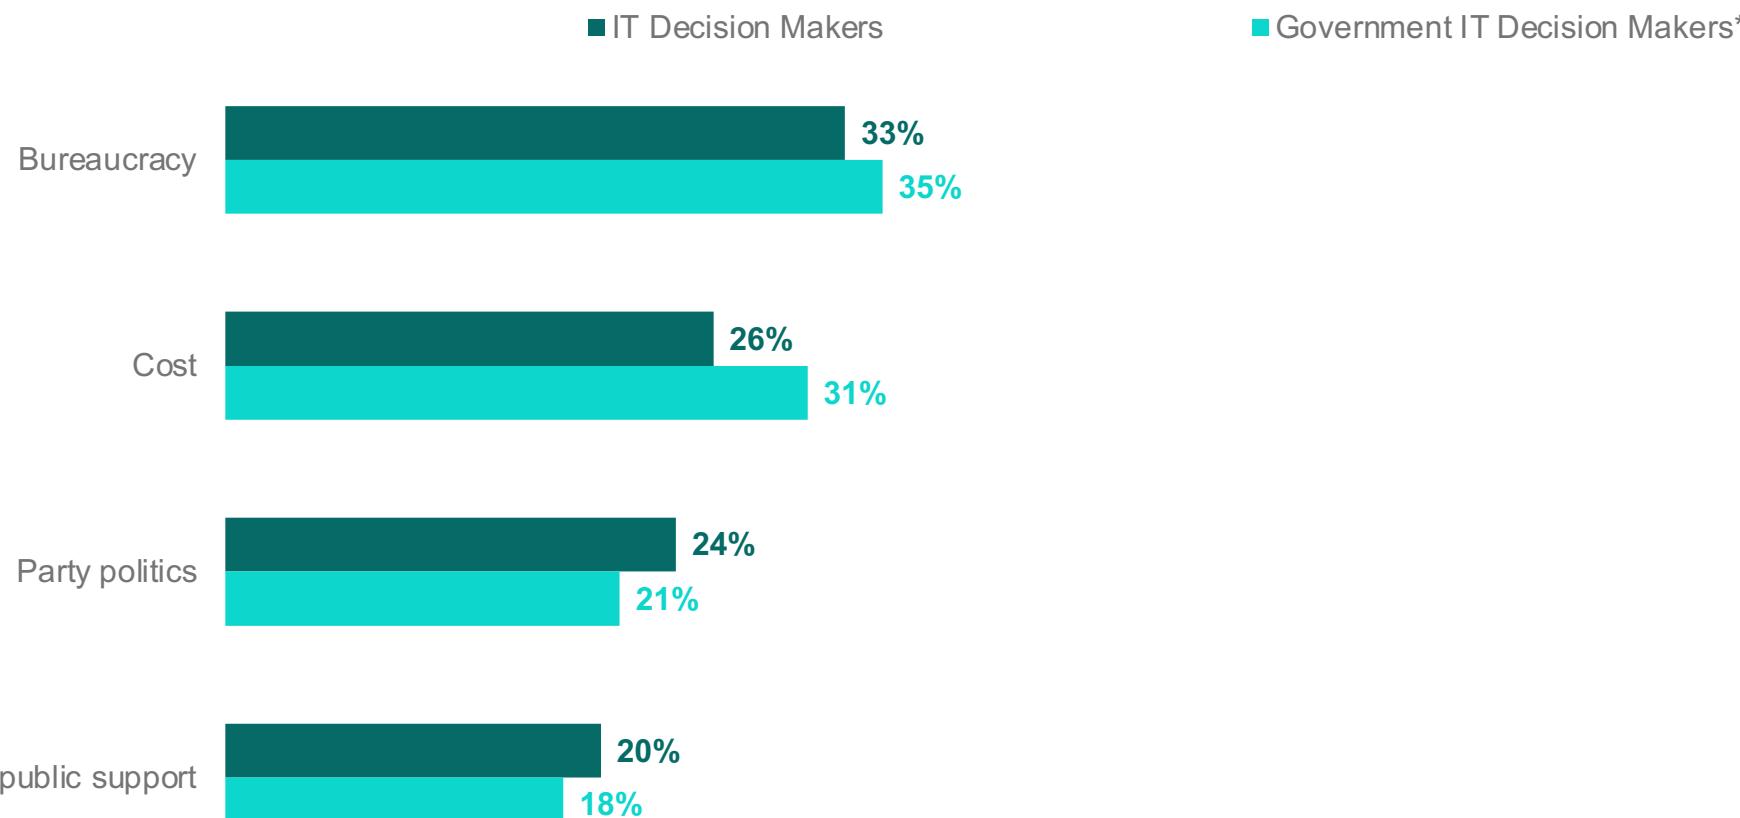

How much of an obstacle to technology/cloud modernization do you think the following are?

MODERNIZATION OF FEDERAL GOVERNMENT TECH

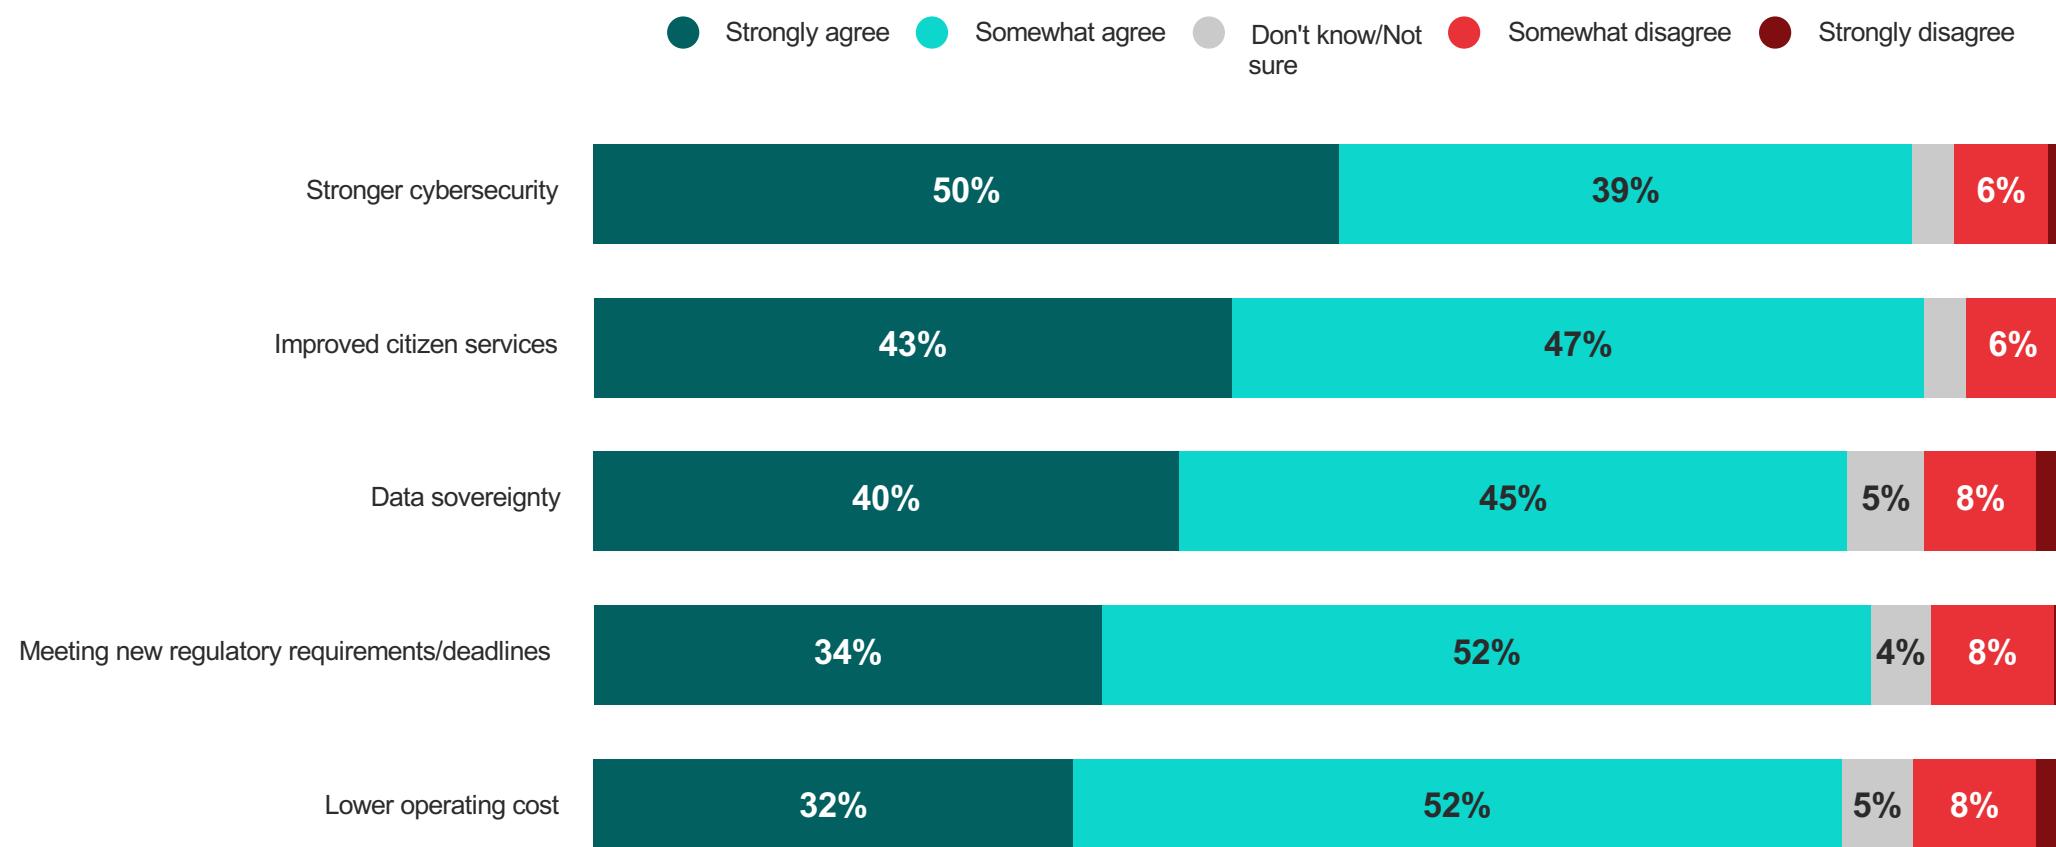

Bureaucracy and cost are seen as the largest obstacles to technology/cloud modernization by both Canadian IT decision makers and government IT decision makers

How much of an obstacle to technology/cloud modernization do you think the following are? **[Showing % Large obstacle]**

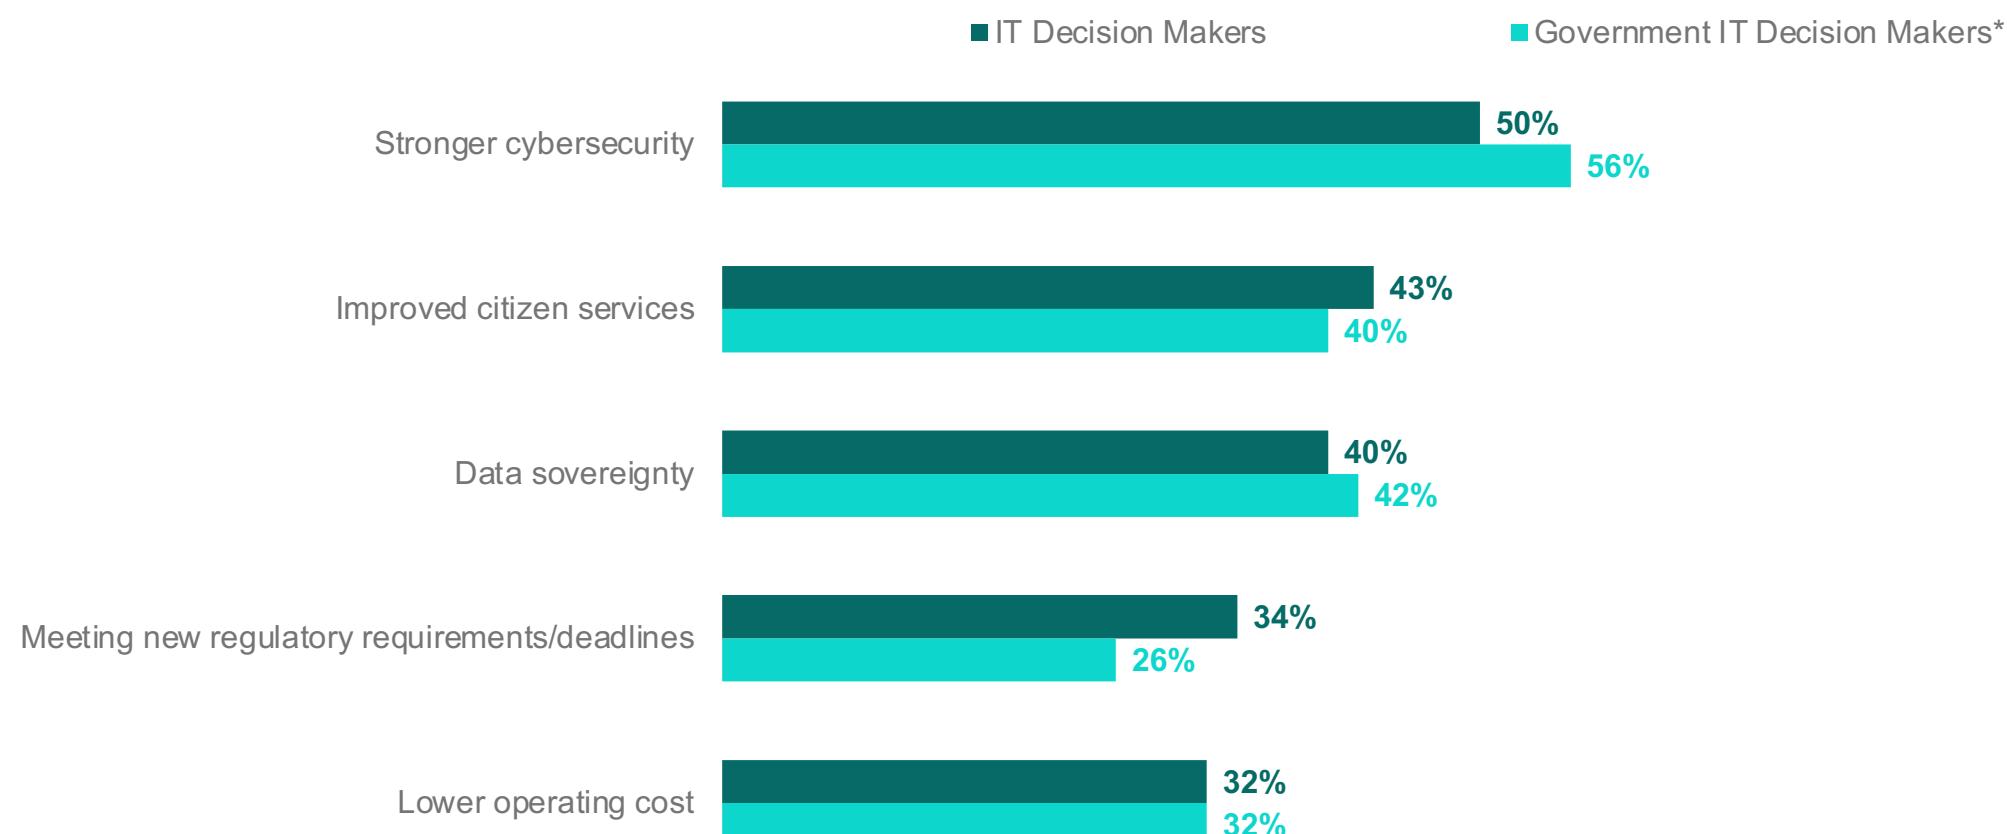

50% of Canadian IT decision makers strongly agree cloud computing better helps modernize federal IT systems in terms of stronger cybersecurity

To what extent do you agree that cloud computing better helps modernize federal IT systems in the following ways?

Over half of Canadian IT decision makers and government IT decision makers strongly agree that cloud computing helps modernize federal IT systems in terms of stronger cybersecurity

To what extent do you agree that cloud computing better helps modernize federal IT systems in the following ways? [Showing % Strongly agree]

AGENDA

MODERNIZATION OF FEDERAL GOVERNMENT TECH

IMPACT OF TECH ON COST & DELIVERY OF SERVICES

CONCERNS AROUND CYBERCRIME

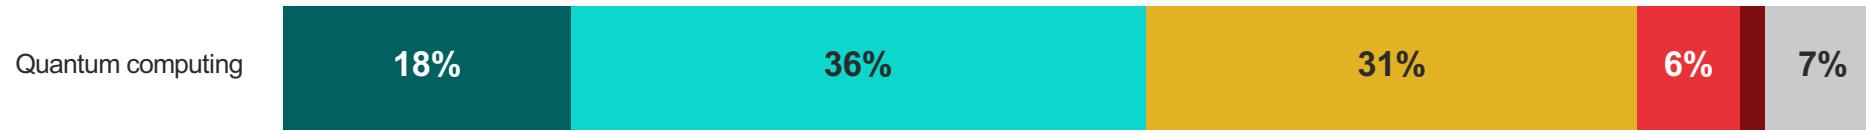

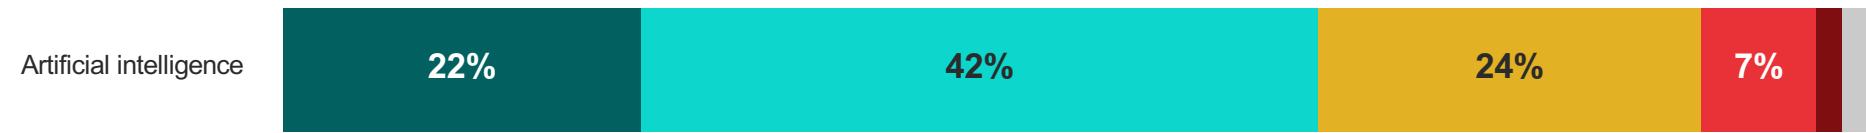

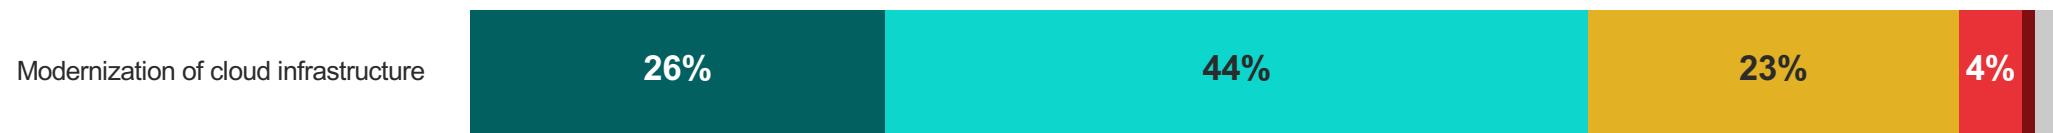

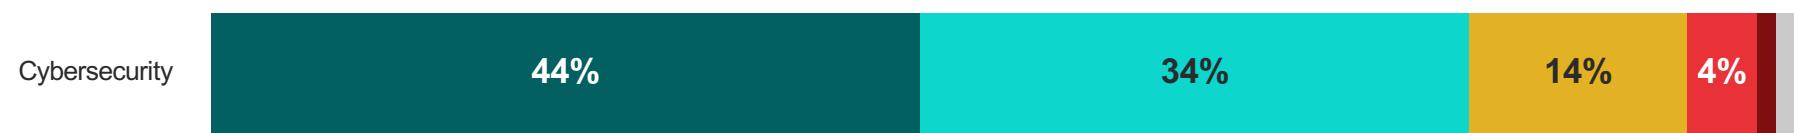

IMPACT OF TECH ON COST & DELIVERY OF SERVICES

44% of Canadian IT decision makers think cybersecurity is critical in reducing government costs and improving delivery of services

How important do you think the following technologies are in reducing government costs and improving delivery of services?

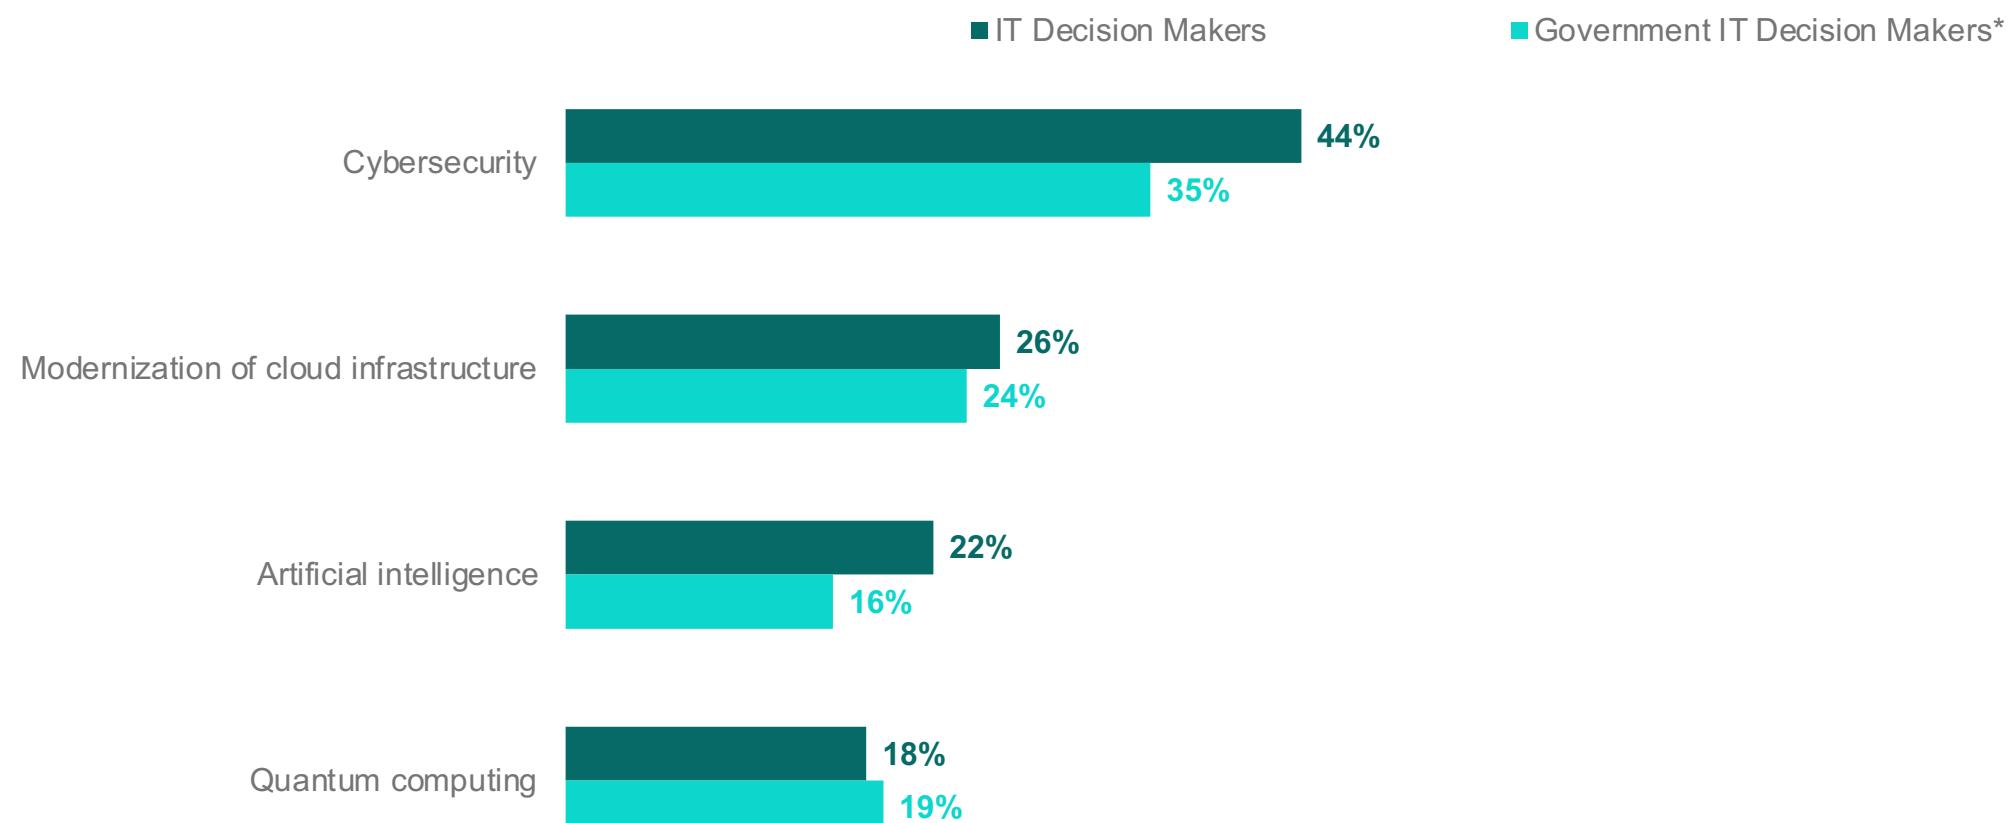

● Critical ● Very important ● Somewhat important ● Not very important ● Not at all important ● Don't know/Not sure

IMPACT OF TECH ON COST & DELIVERY OF SERVICES

Canadian IT decision makers (44%) and government IT decision makers (35%) see cybersecurity as most critical in reducing government costs and improving delivery of services

How important do you think the following technologies are in reducing government costs and improving delivery of services? [Showing % Critical]
