

# Modernize SAP workloads on Microsoft Azure

Accelerate business transformation and growth with strategic alliances

Digital transformation through technology empowers organizations to create new business models and drive growth. But how do you modernize your enterprise quickly while maintaining business continuity? IBM and Microsoft propel businesses forward by bringing out the best of SAP with integrated technologies and consulting services.

## Run SAP on Microsoft Cloud

Microsoft Cloud is one of the most reliable, scalable and secure cloud platforms for SAP. Scale and burst capacity, combined with security, privacy, compliance and AI capabilities, make Microsoft Cloud a hyperscale leader for SAP workloads. As a trusted ally, IBM Consulting™ simplifies and de-risks transformation with value-adding capabilities.

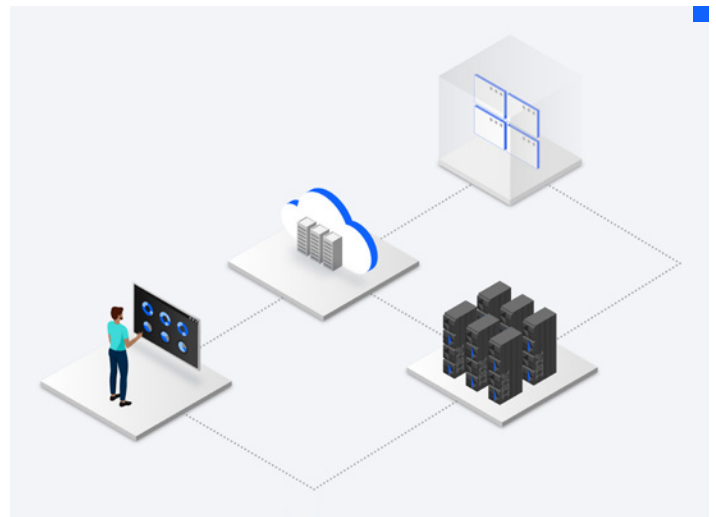

## Lay the foundation for digital transformation with IBM Rapid Discovery

Together with Microsoft, IBM Consulting provides expertise in change management, data and security. With IBM® Rapid Discovery, IBM Consulting also offers knowledge of the capability model and architecture to provide you with a governance and implementation roadmap to better manage and deliver outcomes.

“Despite the disruption of COVID, we went live with our new downstream and corporate SAP S/4HANA solutions on time and within budget, which is a testament to the hard work and close partnership between OMV and IBM Consulting.”

## Markus Berthold

Vice President Corporate IT, OMV Aktiengesellschaft<sup>1</sup>

## Integrate RISE with SAP in BREAKTHROUGH with IBM

RISE with SAP enables clients to move existing SAP enterprise resource planning (ERP) systems to S/4HANA to accelerate cloud transformation. BREAKTHROUGH with IBM adds support when moving to S/4HANA—beyond the S/4 digital core—to create connected and intelligent sustainable enterprises. This end-to-end offering adopts S/4HANA as a digital platform on hybrid cloud and extends its capabilities so you can better support business transformation.

## Move business-critical workloads to hybrid cloud with IBM ManagePlus

Built on RISE RACI roles and responsibilities, IBM ManagePlus is a complementary offering for RISE with SAP. When moving to RISE with SAP, clients can trust that their IT operations management will be treated with the same best practice SAP Reference Architecture used to build RISE with SAP.

## Benefit from the global competencies of IBM Consulting and Microsoft

- 285 plus S/4HANA completed projects
- The largest number of SAP S/4HANA and SAP BTP-certified consultants
- 39,000 Azure Certifications
- Top global system integrator of Red Hat®, IBM Consulting with Azure on the Red Hat OpenShift® Platform
- Microsoft Gold Partner in 17 categories, covering data analytics, data centers, DevOps, security and ERP
