For enterprise:
IBM MaaS360 delivers scalability, security and seamless integration with existing infrastructure.

For small and medium business:
IBM MaaS360 offers simplicity and affordability—per user pricing offers scaling as your business grows.

A high-level overview of IBM MaaS360

Operating systems

Key Capabilities

Multi-OS Device Support
Gain visibility and control over iOS, macOS, Android, and Windows devices, as well as the Internet of Things (IoT).

Bring Your Own Device (BYOD)
Provide easy registration and a perfect balance between productivity and privacy for users.

Mobile Device Management (MDM)
Deploy, protect, and manage your devices from a single console.

Mobile Application Security
Comprehensive lifecycle management for deploying, updating, managing and securing mobile applications.

Content Management Centralized
Backup and management of documents, users, access controls, distributions, and policies.

Mobile Threat Management
Detect and resolve threats on iOS and Android devices to help protect your business from fraud and data loss.

Identity Management
Integration into existing directory systems for mobile authentification and registration and activation of single sign-on (SSO) for MaaS360-compliant applications.

Watson Advisor
Experience deep insights into the relevant endpoint data within the platform, ensuring actionable information that can greatly impact your business.
