

SAP HANA and IBM Power Systems: Better together

Helping enterprises accelerate transformation

Real-time insights. Faster business processes.

Reduce server footprint: Up to **8 SAP HANA instances** on a single IBM® Power Systems™ server¹

French systems integrator and SAP HANA cloud service provider D.FI: **20% reduction** in total costs²

Argentinian natural gas distributor Ecogas: **73% acceleration** in customer payment processing³

North American furniture manufacturer South Shore Furniture: **8x faster** transaction processing⁴

Protect your data and mission-critical workloads.

Up to **99.999%** uptime⁵ on IBM Power Systems

Ranked **No. 1** in every major reliability category by ITIC⁶

Security built into all layers of the stack—processor, systems, firmware, OS and hypervisor

Gain the flexibility to meet current and future demands.

Cloud-ready

Mix-and-match server environments

Capacity on demand

Ready for advanced analytics, AI, deep learning workloads
