

“How do I deliver a B2B integration solution that makes us *more competitive?*”

Leverage IBM's extensive experience in B2B integration to build a strategic integration platform that satisfies your company's operational requirements.

My company needs to...

- Standardize B2B processes
- Improve cycle times
- Centralize onboarding activities
- Eliminate processing downtime
- Provide insight into B2B processes

I need...

- A single secure gateway
- Simplified onboarding
- High availability
- Adaptable capabilities
- Visibility and analytics
- Flexible deployment models

Single, secure gateway for files and documents

Simplified onboarding and self-service partner management

High availability for zero downtime

Adaptable capabilities, data transformation and standards

Advanced analytics to leverage the wealth of data

On premises, local, hybrid cloud deployment options

The answer is...

IBM B2B Integration

Be the architect of a strategic company asset that provides *competitive advantages.*
