

Improve Processes Faster with IBM® Process Mining – Live Demo

IBM's experts will give a live demo to show the advantages of combining IBM Blueworks Live and IBM Process Mining.

Our experts will demonstrate the five most compelling benefits of applying process mining insights to augment the work you do in IBM Blueworks Live for faster process improvements that guarantee ROI.

Request a demo to see how IBM Process Mining can help IBM Blueworks Live users:

- Apply a design thinking approach to model new processes through process simulation
- Test process improvements in IBM Blueworks Live models before implementation
- Automatically discover process paths with the best time and costs
- Understand if the process documentation captures how processes are really performing
- Keep process models up to date with continuous process analysis
